COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD111B/22	Course title: Alternative approaches in education
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 4.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Verification of the student's acquisition of relevant knowledge, skills and competences is carried out on the basis of a final written test (100-0%). Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Student : - Has mastered key facts about alternative schooling - Knows the basic characteristics of selected alternative educational approaches. - Can explain their pedagogical and psychological background, describe the organisation and main principles of a given alternative school. - Has the ability to navigate in the contemporary pedagogical scene - to distinguish appropriate and beneficial approaches, to creatively use their individual elements in practice.	
Course contents: Alternative school - concept, causes of emergence. 2. Features, characteristics, functions of alternative schools. 3. Alternative school as a pupil-oriented school. 4. Comparison of traditional and alternative pedagogical concepts of teaching. 5. Types and division of alternative schools. 6. Characteristics of classical reform schools. Origin and development, general characteristics. 7. Waldorf school. 8. Freinet school. 9. The Jena School. 10. Montessori school. 11. Dalton School, Jena Plan.	

12. Characteristics of modern alternative schools - origin and general characteristics. Open teaching, Integrated thematic teaching, Closed-loop system of teaching.
13. Pedagogical innovations.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD104C/22	Course title: Assessment in education
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture Recommended study range: hours weekly: 1 hours per semester: 13 Teaching method: on-site	
Credits: 2	Working load: 50 hours
Recommended semester/trimester: 5.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: During the semester, the student demonstrates his/her theoretical knowledge by completing sub-tasks and assignments related to the area of student assessment. He/she develops and presents an assessment in a selected country of the world or in a selected alternative school, or drafts a self-assessment letter. Course Assessment: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: - The student will be able to define the basic terminology of the field of pupil assessment - The student will have knowledge of the different methodological guidelines for the assessment and classification of pupils according to the types of schools. - He/she will have knowledge of methods, forms and ways of pupil assessment, of collecting data for pupil assessment. - be able to carry out formative and summative assessment correctly - The student will acquire the professional competences necessary to implement the evaluation of the teaching process. - Works creatively with learning to self-assess pupils, authentic and peer assessment, as well as applies self-assessment techniques in his/her practice - Is able to carry out objective classification as well as verbal assessment of pupils	
Course contents: 1. Definition of assessment, classification, verbal assessment. 2. Current state of pupil assessment and classification in Slovakia. 3. Assessment in the world and in EU countries. 4. Objectives and functions of school assessment. 5. Methods of assessment and classification.	

6. Forms and types of assessment.
7. Humanisation of assessment.
8. Evaluation of educational subjects.
9. The impact of assessment on the pupil.
10. Assessment of special school pupils, integrated pupils, etc.
11. Pedagogical documentation on assessment.
12. Types of report cards.
13. Pupil self-assessment- games and exercises for developing assessment skills.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD101C/22	Course title: Basics of first aid
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture Recommended study range: hours weekly: 1 hours per semester: 13 Teaching method: on-site	
Credits: 2	Working load: 50 hours
Recommended semester/trimester: 3.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: The final grade will be the sum of the points obtained from the solution of the problem. Evaluation criteria: the final evaluation will be the sum of the points obtained from the theoretical knowledge (max 30 points) and the practical performance (max 70 points) of the first aid. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: To become familiar with the causes of life-threatening conditions. Know the principles and practical solutions of first aid for life-threatening injuries to the human body. After completing the course Fundamentals of First Aid, the student will acquire the following knowledge, skills and competencies: Knowledge: Know the biological nature of life-threatening conditions and the consequences resulting from damage to individual systems. Skills: Respond appropriately to a life-threatening situation and provide basic life-saving actions. Competencies: The student will be able to manage and adequately provide pre-medical first aid for life-threatening conditions. The student can apply the acquired knowledge in the context of educating the environment and future students. Verification of the degree of acquired knowledge, skills and competences: Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of the final solution of the assigned problem.	
Course contents: 1-2/ Introduction to first aid (legislation, general principles of first aid, first aid kit).	

3-4-5/ Life-threatening conditions - causes, Unconsciousness, Airway patency disorders, Acute cardiac events, Shock - cardiopulmonary resuscitation: training.
6-7/ Trauma, bleeding and wounds. Dressing techniques - practice.
8/ Intoxications.
9-10/Nerve disorders (convulsions, strokes, psychiatric disorders). Metabolic causes of ill health (hypoglycaemia). Sudden abdominal episodes.
11-12/External causes of health impairment -burns, frostbite, electrocution, drowning, animal bite.
13/ Solving a given problem situation.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD114A/22	Course title: Basics of special pedagogy
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 2 hours per semester: 26 / 26 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 4.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: During the semester, the student completes a term paper related to education of a child/student with a disability in mainstream school settings, an ongoing written test and a final (oral/written) examination. The final grade will be the sum of the points the student receives from the continuous assessment (max. 40 points) and the final assessment (max. 60 points).	
Learning outcomes of the course: Knowledge: The student has a basic theoretical understanding of the development of special education and consequently the goals, Theoretical background of special pedagogy and its objectives, tasks, system of special pedagogy oriented to a person with disabilities. The student is able to apply the acquired knowledge in understanding the relationships between the related sciences and special pedagogy. Skills: The student can analyze, synthesize, compartmentalize, and transfer information about etiology and symptomatology of disabilities in their profession as a school teacher or school institution. Competencies: The student will acquire knowledge of types, degrees, and types of disabilities, disruptions, and threats and will be able to apply in the development of an individual educational plan for a child/pupil with special educational needs. He/she is also competent to use the knowledge acquired within the framework of his/her profiling as a teacher. Verification of the acquired knowledge, skills and competences: Verification of the acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of the presentation of the seminar work in terms of a proposal for a solution to a specific situation in the form of a modular example of an individual educational plan for a pupil with special needs	

educational needs. The verification will be evaluated during the continuous and final verification in written and oral form.

Course contents:

History of special education - characteristics of different historical periods in relation to disabled people. Special pedagogy (aim, subject, tasks). Special pedagogy in the system of sciences- boundary and auxiliary disciplines of SP - classification and characteristics of boundary and auxiliary sciences System of special pedagogy (branches of special pedagogy). Norm, normality , abnormality, anomaly, developmental anomalies. Groups of persons with special needs (classification, characteristics.) Education of children and pupils with special educational needs in the conditions of schools and school facilities Classification and possibilities of education of children and pupils on the basis of disability, disruption and threat. Formation of individual educational plan and possibilities/limitations of use in educational practice.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD111A/22	Course title: Cooperation between school, family and community
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 2 hours per semester: 26 / 26 Teaching method: on-site	
Credits: 5	Working load: 125 hours
Recommended semester/trimester: 3.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: The goal of the subject is to specialise knowledge, skills and eligibility of the student in multidisciplinary collaboration, also specifically support and develop participative, transparent and inclusive process of multidisciplinary support among chosen stakeholders of inclusion, academic success and mental health protection. Verifying the level of gained knowledge, skills and competencies of the student is carried out using the „development portfolio of a pedagogue“ which includes: # Specific school, family and community collaboration # Definition of approaches, pedagogical and expert activities of a multidisciplinary team during the school, children, pupil, family and community collaboration across various degrees/areas of support # Identification of child and pupil needs and participative links in comprehensive upbringing and education in the community # Creation of values and techniques of a multidisciplinary team during school, family and community collaboration # Self-evaluation part of the student – auto-evaluation of knowledge, skills and competencies of the student in the context of multidisciplinary collaboration # Preferred self-development plan within lifelong education After passing the subject, the student will become a specialist in the area of multidisciplinary school and family collaboration, also a specialist in involving communities in participative approaches, pedagogical and expert activities in a multidisciplinary team across various degrees/areas of support. He will know how to actively and meaningfully involve a community subject and the parent/legal representative in solutions and comprehensiveness of child/pupil support, ideally so that he actively creates and helps effective intervention within academic success support and mental health protection. Final evaluation: Evaluation of the portfolio consists of two parts – 1. characteristics of needs of the people involved and their communities in the context of a multidisciplinary team’s activities (40%) and 2. advocacy of proposed participative techniques in multidisciplinary collaboration and a self-development plan in the context of multidisciplinary support (60%). Subject evaluation: A – 100%-93%	

B – 92%-85%
 C – 84%-77%
 D – 76%-69%
 E – 68%-60%
 Fx – 59%- 0%

Learning outcomes of the course:

- student is able to initiate and conduct participative processes of involving people involved and their communities in multidisciplinary collaboration,
- student is able to map, identify and characterise needs of people involved and of communities' in the context of inclusive support and support opportunities for schools/school facilities,
- student, together with the community (as a relevant member of the team), is able to establish and personalize multidisciplinary support of children and pupils in the context of mental health protection and academic success
- student is able to design his own development plan of specific knowledge, competencies and eligibility as a key person in the inclusive change

Course contents:

1. Theory of school, family and community collaboration
2. Introduction into school, family and community collaboration theory
3. Specifications of school, family and community collaborations I. – etiology of community
4. Specifications of school, family and community collaborations II. – identity and social adaptability
5. Attendance of people involved in a multidisciplinary team
6. Multidisciplinary support – school, family and community collaboration in participative processes
7. Inclusive school, family and community collaboration values
8. Pillars of school, family and community collaboration
9. Processes of school, family and community collaboration
10. Introduction into participative models of school, family and community collaboration
11. Participative models of school, family and community collaboration
12. Multidisciplinary support of school, family and community collaboration
13. Multidisciplinary support – development of specific skills of a multidisciplinary team member in interventions focused on groups in risk focusing on mental health (development plan and auto-evaluation of specific skills)

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD104A/22	Course title: Cooperative learning
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 1.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: During the semester, the student demonstrates his theoretical and practical knowledge in the areas of cooperative learning with a practical impact on the didactic projection of his subject profile. Final assessment: presentation of a model lesson (100%). Subject evaluation: A – 100%-93% B – 92%-85% C – 84%-77% D – 76%-69% E – 68%-60% Fx – 59%- 0%	
Learning outcomes of the course: The aim of the subject is to present basic theoretical knowledge and didactic examples of the application of cooperative learning in educational situations to optimize one's own educational experiences. Learning outcomes: After completing the subject, the student will acquire the following knowledge, skills and competences: - can analyze the basic terminological-methodological and historical contexts of cooperative learning, - can present the structural, procedural and content dimensions of cooperative learning. - knows and can classify the starting points and signs of cooperative learning. - can apply the principles of cooperative learning in practice and propose possible ways of its most effective application in education.	
Course contents: Basic terminological connections. Basic features of cooperative learning. Criteria for effective implementation of cooperative learning. Critical analysis and evaluation of the cooperative teaching method. Explanation of cooperative learning teaching technology. Analysis of the influence of cooperative learning on improving the quality of the relational level of the educational process.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD113B/22	Course title: Coping with conflict situations
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 5.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Become familiar with the typology of behaviour in conflict situations. Learn effective methods and strategies for dealing with diverse conflict situations. To be able to spot potential conflicts at an early stage and deal with them on the basis of their nature. Understand the differences in the experience of conflict between people. To be able to resolve conflict situations from the school environment using model situations. Course Evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: <ul style="list-style-type: none"> - The student will be able to define the terms conflict, stress, and frustration, and will be familiar with methods of authoritative and alternative conflict resolution. - The student will have knowledge of the use of empathic and assertive communication in the school setting, and will be able to correctly apply some non-violent communication techniques in a relational educational setting. - The student will be able to properly use monologue and dialogue in managing conflict situations in an educational setting - Will practically and creatively handle conflict resolution in communication teaching situations. - Will be able to appropriately address devaluing communication issues in the classroom. - The student will acquire and practice communication, social, interpersonal and personal competencies. 	
Course contents: . Human motivation in situations of stress - stress, frustration, conflict. 2. Options for dealing with and coping with challenging/conflict situations at school. 3. Conflict as a stressful/challenging situation. The conflict curve. 4. How to prevent conflict.	

5. What happens when conflict is not resolved. Prerequisites for successful conflict resolution.
6. How to listen actively.
7. Ways to resolve conflicts.
8. Alternative solutions to conflict in school.
9. Authoritative solutions to conflict in the school environment
10. Reasons for pupil's conflict behaviour.
11. How a teacher can induce conflict behaviour in a pupil.
12. What to do when conflicts arise in the classroom.
13. Other conflict situations in school.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD102C/22	Course title: Creative reading and writing
Type and range of planned learning activities and teaching methods: Form of instruction: Seminar Recommended study range: hours weekly: 1 hours per semester: 13 Teaching method: on-site	
Credits: 2	Working load: 50 hours
Recommended semester/trimester: 4.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Verification of the extent to which the student has acquired the relevant knowledge, skills and competences is implemented on the basis of written outputs - creation of own author's portfolio - during semester teaching of the subject. During the semester the student demonstrates practical skills in the area of creative reading and writing in the form of reading and writing outputs that compiled in an author's portfolio, for use in the final course evaluation. Their demonstrates theoretical knowledge of creative reading and writing through active participation in seminar discussions. Final grade: summative percentage gain on written written output - author's portfolio (70%) and active participation in discussions (30%). Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: the student can define the basic concepts and theoretical background of creative reading and writing in the educational process, - is able to implement some practices of improving writing, literary and creativity competences, - is able to reflect on the creative process and creative products, - is able to apply the acquired knowledge in his/her own academic and creative activities	
Course contents: Basic principles of creative reading and writing. 2. Possibilities of using creative reading and writing in the educational process. 3. Techniques of creative reading and writing. 4. Basics of literary theory - selected literary concepts and their identification in literary works. 5. Creative reading - analysis and interpretation of poetry and prose texts. 6. Critical writing about literature - literary criticism. Comparison and evaluation of literary texts by contemporary authors. 7. Creative writing	

and student authors' reading (poetry, prose, reportage, translation, etc.) Interpretive and critical discussion. 8. Portfolio of one's own literary work and critical reflection on one's own literary work.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD118A/22	Course title: Didactics
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 3 hours per semester: 26 / 39 Teaching method: on-site	
Credits: 8	Working load: 200 hours
Recommended semester/trimester: 5.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: During the semester, the student demonstrates his/her theoretical knowledge of general didactics by completing sub-tasks and assignments related to the field of teaching. He/she develops a lesson proposal in which he/she applies the principles and means of modern teaching with the application of activating methods. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: - The student will be able to define the basic terminology of the field of didactics. - The student will have knowledge of the different categories of didactics and will be able to translate them into the modelling of the teaching process. - The student will have knowledge of the use of modern activating methods that he/she can implement in his/her teaching. - The student will be able to plan and implement a lesson correctly. - The student will acquire the professional competences necessary to implement the teaching process. - The student will be able to deal practically and creatively with didactic situations.	
Course contents: 1. Concept and subject of didactics - definition of the subject, tasks, goal. Basic didactic concepts and categories. The position of didactics in the system of pedagogical sciences Historical cross-section of the views of various authors on didactics. 2. Concepts of teaching in historical cross-section, humanistic and systemic approaches to teaching. 3. Goals of teaching, taxonomies of teaching goals.	

4. Concretization of educational content - ISCED, RUP, curricula, syllabuses, educational standards, SKVP, TPU, pedagogical documentation. Key competences in the state educational programmes.
5. Teaching process, concept, essence, its phases and cycle. Personality of teacher and pupil in Teaching process. View of the key competences of the teacher and the pupil, their importance and contribution.
6. School books, types of school books, their functions, requirements for their creation.
7. Teaching principles, their practical application in the educational process.
8. Teaching methods, their classification, brief characteristics of classical teaching methods methods. Modern teaching methods and their brief characteristics. Brainstorming, 5W, Ditor, Philips 66, Hobo and Gordon's method, 653 method, 6 thinking hats, the ZOS method and others.
9. Organisational forms of teaching - lesson and its phases. Creative approach to the lesson.
10. Material teaching resources - teaching aids and didactic technology in the classroom.
11. Evaluation of the pedagogical process. Evaluation and classification, verbal evaluation. Self-evaluation. Report cards. Methodological guidelines. Pedagogical and psychological aspects of evaluation.
12. Options for building modern and effective teaching, responding to change. From distance learning to hybrid education.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD106B/22	Course title: Education of Romani Pupils
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 3.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: The goal of the subject is to specialise knowledge, skills and abilities of the students in education of Roma students and also specifically support and develop a participative, transparent and inclusive process of multidisciplinary support among chosen stakeholders of inclusion, school success and mental health protection. Verifying the level of gained knowledge, skills and competencies of the student is carried through using the „development portfolio of a pedagogue“ which includes: <ul style="list-style-type: none"> ▪ Roma student education specifications ▪ Definition of approaches, pedagogical and professional activities of the multidisciplinary team during Roma student education across degrees/areas of support ▪ Identification of student need and participative links in education ▪ Creation of values and techniques of the multidisciplinary team while working with Roma students ▪ Self-evaluation of the student – auto-evaluation of knowledge, skills and competencies of the student in the context of Roma student education ▪ Preferred self-development plan within lifelong education After passing this subject, the student will become a specialist in Roma student education support, the inclusion of his community in participative approaches, pedagogical and expert activities in a multidisciplinary team across degrees/areas of support. He will know how to actively and meaningfully make community subjects and parents/legal guardians participate in the solving process and comprehensiveness of a multidisciplinary team’s support, ideally creating and helping in effective intervention within the support of school success and protection of Roma student mental health. Final evaluation: Evaluating the portfolio consists of two parts – 1. characteristics of the Roma student’s needs and of his community’s needs in the context of the multidisciplinary team’s activities (40%) and 2. advocating the proposed participative techniques in the education of a student and the self-development plan in the context of multidisciplinary support (60%) Subject evaluation: A – 100%-93% B – 92%-85% C – 84%-77%	

D – 76%-69%
E – 68%-60%
Fx – 59%- 0%

Learning outcomes of the course:

- student is able to initiate and conduct participative processes including Roma students and their families into multidisciplinary support,
- student knows how to map, identify and characterise the needs of a Roma student in the context of inclusive support and abilities of the school/school facility,
- students, together with the family and community (as relevant members of the team), is able to establish and personalize multidisciplinary support of a Roma student in the context of mental health protection and school success,
- student is able to design his own specific knowledge, competence and eligibility development plan of a key actor in inclusive change

Course contents:

1. Theory of Roma culture and education
2. Introduction into the theory of Roma student education
3. Specifics of Roma student education I. - cognition
4. Specifics of Roma student education II. - social adaptability
5. Legal representative and broader Roma family in a multidisciplinary team
6. Multidisciplinary support – legal representative and broader Roma student family in participative processes
7. Inclusive values of Roma student education
8. Pillars of school, Roma student and community collaboration
9. Processes of school, Roma student and community collaboration
10. Introduction into participative models of Roma student education
11. Participative models of Roma student education and collaboration
12. Multidisciplinary support of Roma student education
13. Multidisciplinary support – development of the multidisciplinary team member's skills in interventions focused on Roma students (development plan and auto-evaluation of specific skills)

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD100B/22	Course title: Inclusive approaches in school education
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture Recommended study range: hours weekly: 2 hours per semester: 26 Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 1.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: During the semester, the student will present a term paper related to the life of a person with disability and passes a mid-term written test and a final (oral/written) exam. The final grade will be the sum of the points the student receives from the midterm (40 points maximum) and the final assessment (60 points maximum).	
Learning outcomes of the course: Knowledge: The student will acquire basic theoretical knowledge about inclusive education, chances and risks of inclusive education and about inclusive strategies as potential tools in the development of and sustaining inclusive environments. Skills: The student will be able to analyze, synthesize, compartmentalize, and transfer information about inclusive environments in the process of educating all children without distinction in his/her profession as a school teacher or school institution. Competencies: The student is able to apply the knowledge acquired about inclusive education strategies in the development of individual school plan for a group, class and/or school. The student is able to use the acquired knowledge to The student is competent to use the knowledge gained in the context of his/her profile as a teacher. Verification of acquired knowledge, skills and competences: Verification of the acquisition of the relevant knowledge, skills and competences of the learner is carried out on the basis of the presentation of a seminar paper on the life of a person with a disability in the conditions of an inclusive school. The verification will be assessed during the continuous and final verification in written and oral form.	
Course contents:	

Basic terminological apparatus of inclusive pedagogy - goals, possibilities and components. Trends and perspectives of inclusive education. Retrospective of education of children and pupils with disabilities (the process of segregation and integration; advantages and disadvantages of segregated and integrated education; assessment tools for integrative and inclusive education). Legislative indicators of inclusive education in schools. Anthropological foundations of integrative and inclusive education. Comparative inclusive pedagogy (current trend with the trend abroad). Preparation of educators and environment for inclusive education in formal and non-formal process (praxeological dimension).

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD110B/22	Course title: Intercultural Education and Prejudices
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 4.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Elaboration of a semester project. The student can obtain a maximum of 100 points, to pass the course it is necessary to obtain a minimum of 60 points. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Student 1. Acquires: - Knowledge of the basic concepts related to the issue of intercultural education. - Knowledge of the basic target areas and categories of intercultural education - knowledge of the differences between the culturally standard and transcultural concepts of intercultural education - knowledge of the content and scope of the concept of tolerance, its levels. Knowledge of the possibilities, limits and means of tolerance education - knowledge of the content and scope of the concepts of prejudice and stereotype. - knowledge of effective methods and strategies of intercultural education 2. Able to: - understand the content and scope of concepts related to the issue of intercultural education. - find effective didactic methods and strategies of intercultural education 3. Assess: - the effectiveness of methods and strategies of intercultural education 4. Create: - a project with activities for a school children's club aimed at fulfilling the objectives of intercultural education	
Course contents:	

Basic concepts related to intercultural education. Culture, subculture, acculturation, enculturation. Definition of intercultural education. Basic target areas and categories of intercultural education. Tolerance and education for tolerance - possibilities, limits, means. Prejudice and anti-prejudice education - possibilities, limits, means. Co-ethnicity and education for belonging - possibilities, limits, means.
Basic strategies and methods of intercultural education.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD100A/22	Course title: Introduction to Pedagogical Sciences
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 2 hours per semester: 26 / 26 Teaching method: on-site	
Credits: 6	Working load: 150 hours
Recommended semester/trimester: 1.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Verification of the student's acquisition of relevant knowledge, skills and competences is carried out on the basis of a final written test (100-0%). Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: After completing the course, the student will acquire the following knowledge, skills and competences: Knowledge: The student will acquire the theoretical foundations of the pedagogical process, he/she will be able to characterize the concept of pedagogy, classify and evaluate basic pedagogical concepts and categories, apply them in other pedagogical disciplines and be able to understand them in a broader context. Skills: The student can effectively and creatively apply acquired knowledge, experience and skills in improving the process of learning and improving pedagogy as a science. Reflect on the contemporary conception of pedagogy, the subject of pedagogy, and the content of pedagogy. Define the structure of pedagogical sciences, its relationship to other sciences. Integrate and process newly acquired knowledge, information and experience for the benefit of the development of the field and its practical application. Competencies: The student has the ability to manage effectively, to solve problems, to develop and assess pedagogical situations.	
Course contents:	

1. Basic concepts in pedagogy. Definition of the term "pedagogy", the subject of pedagogy. Basic pedagogical terminology.
2. Educational reality: educational processes, educational constructs, educational environment, education, educational process, teaching, learning, education... Education and learning as key concepts in pedagogy, self-education and self-education. General model of the educational process.
3. The system of pedagogical sciences and their development.
4. Educational environment, types of educational environment.
5. Personality - its formation, formation, internal and external factors of personality formation.
6. Pupil - subject of education. Comprehensive understanding of the pupil's personality.
7. The teacher and his profession. Teacher - characteristics of the educator's profession, definition of the teacher's profession. Pedagogical competence of teachers. Charter of the teacher. Self-reflection in the teacher's professional activity.
8. Family as an environment of education.
9. School as an institutional environment of education.
10. School and educational problems.
11. Goals of upbringing and education.
12. Selected elements from alternative schools and systems.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD121A/22	Course title: Leisure Pedagogy
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 2 hours per semester: 26 / 26 Teaching method: on-site	
Credits: 6	Working load: 150 hours
Recommended semester/trimester: 5.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Verification of the student's knowledge of leisure pedagogy will consist of a theoretical written examination (100%), for which 100 points can be obtained. A minimum of 93 points is required for an A grade, a minimum of 85 points for a B grade, a minimum of 77 points for a C grade, a minimum of 69 points for a D grade and a minimum of 60 points for an E grade. Course Assessment: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: the student can differentiate pedagogical, psychological, axiological and sociological approaches to children's/pupils' leisure time, - the student knows the institutions that educationally influence the possibilities of organising children's/pupils' leisure time - the student knows the requirements for the personality of a leisure educator, educator and animator, both professionally and personally, - can compare the factors influencing positive and negative use of children's/pupils' leisure time, understands the need to motivate and influence children's/pupils' attitude towards active and fulfilling leisure time, - knows the basic principles of the process of managing educational activities, has an overview of the institutions and organisations involved in the implementation of leisure activities, - has an overview of the forms and methods aimed at effective leisure time, - reflects current trends and approaches to the pedagogical activity of the leisure-time educator in educating children/pupils in leisure-time activities.	
Course contents:	

1. Leisure as a challenge for contemporary society. The concept of leisure, factors influencing the formation of attitudes towards leisure. The current state and possibilities of meaningful leisure.
2. Leisure and leisure education in historical context.
3. Institutions for leisure and out-of-school time education.
4. Pedagogy of leisure - basic conceptual apparatus. Aims and tasks of leisure education. Content, forms and means of leisure education.
5. Personality of the leisure educator, educator and animator, his/her tasks. Specifics of pedagogical communication in leisure education..
6. Educational and interest activities in education outside the classroom.
7. Experiential pedagogy - basic conceptual apparatus. Play in the pedagogy of experience. Experiences of the participant of the game.
8. Prevention against social pathological phenomena and educational action - preventive function of leisure time.
9. Organizations and associations of children and youth for the implementation of leisure activities.
10. Movement of Christian communities of children - eRko.
11. Activities of religious orders, religious associations in the field of out-of-school education.
12. Information and communication technologies in out-of-school education.
13. New approaches in leisure time pedagogy.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD110A/22	Course title: Methodology of pedagogical research
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 2 hours per semester: 26 / 26 Teaching method: on-site	
Credits: 6	Working load: 150 hours
Recommended semester/trimester: 3.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Verification of the degree of acquisition of relevant knowledge, skills and competences of the student is carried out on the basis of theoretical knowledge and practical activities during the semester course. - active participation in lectures and exercises - elaboration of an independently conceived research project - final test: the student can obtain a maximum of 100 points, to pass the course it is necessary to obtain a minimum of 60 points. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: - The student will be familiar with the basics of methodological foundations to investigate and understand the regularities of pedagogical phenomena. - The student will master and acquire a basic knowledge base of empirical research methods used in pedagogy and their statistical processing. - The student will be able to orient himself/herself in the functions of scientific cognition. - The student will be familiar with the basic concepts of research methodology. - The student will have an overview of information sources for research. - The student will have a working knowledge of descriptive statistics, basic probability theory and mathematical statistics to the extent of a practitioner without knowledge of higher mathematics. - The student will be proficient in the methodology of developing a research strategy, preparing, using and evaluating the methods he/she will work with in conducting research. - The student will be able to use basic pedagogical research methods and techniques, focusing on the process of presenting, evaluating, analysing and interpreting research findings.	
Course contents:	

1. Pedagogical phenomena and processes.
2. Approaches to the interpretation of pedagogical phenomena and processes.
3. Ethics of the researcher and the ethical aspect of pedagogical research. Ethical principles of conducting research
4. Quantitative and qualitative research. Advantages and disadvantages. Possibilities of appropriate combination.
5. Educational research, its types, stages and process.
6. Methods of knowledge acquisition. Experimental method, measurement, correlation method, correlation coefficient, comparison of differences, etc. Observation, exploration, tests, analysis of the results of activities, case studies, etc. Statistical file, sorting, graphical display.
7. Hypothesis testing. Reliability and validity of results.
8. Research methods with a focus on obtaining information about the problem under study.
9. Research methods focusing on the processing of empirical data.
10. Research methods focusing on the interpretation of research results.
11. Techniques for expressing the data obtained. Formulating conclusions and recommendations.
12. Action research in pedagogy. Empirical microanalysis of educational processes, outcomes and products. Educational testing and research on social climate in the school classroom.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD117B/22	Course title: Modern Educational Strategies
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 6.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: The student develops a lesson proposal in which he/she creatively uses modern teaching methods, is able to implement them in any stage of teaching and subsequently evaluates their effectiveness. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: - The student will be able to define the theoretical definition of activating methods in teaching - The student will have knowledge of the use of modern activating methods that he/she can implement in his/her teaching. - The student will be able to plan and implement a lesson correctly using modern teaching methods	
Course contents: 1. Characteristics of methods according to the effect on the personality of the pupil. 2. Classification of methods according to different aspects, their meaning and use. Principles of work in the classroom. 3. Methods that make pupils' understanding and memorization more effective. 4. Mind map, self-expression and self-representation. 5. Brainstorming. Discussion methods. Panel discussion, Philips 66, Hobo method, Gordon method, 6 thinking hats. 6. ZOS method. Other activating methods. 7. Project based learning, product work. 8. Cooperative learning, cooperative play. Group work. 9. Creative methods of self-learning. 10. Staging methods. Simulation and situational methods. 11. Play as a teaching method. 12. Methods of working with the class according to M. Silberman.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD108A/22	Course title: Pedagogical and social communication
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 2 hours per semester: 26 / 26 Teaching method: on-site	
Credits: 6	Working load: 150 hours
Recommended semester/trimester: 2.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: During the semester, the student demonstrates his/her theoretical knowledge of social and pedagogical communication by active participation in communication activities, games, pantomimes, etc. He/she performs a micro-output according to the recommendation: examples of developing communication skills (a narration limited by a set time and presented in front of a group), in which he/she demonstrates his/her acquired and improved verbal and non-verbal skills. Is capable of self-reflection and self-assessment, and can respond appropriately to peer feedback. Course Assessment: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: <ul style="list-style-type: none"> - The student will be able to define the basic terminology of social and pedagogical communication. - The student will be able to list and understand the elements of verbal and non-verbal communication and will know the methodology of their use in school practice. - He/she will have knowledge of the use of empathic and assertive communication in school, he/she will be able to use correctly some techniques of non-violent communication in relationships in the educational environment. - The student will be able to conduct monologue and dialogue in the classroom, appropriately form and verbalize questions, and respond to student responses. - Practically and creatively handle communication teaching situations. - He/she will be able to implement meetings with parents through experiential communication activities, to develop school and family cooperation. - Will be able to deal appropriately with devaluing communication problems in the classroom. - He/she will review and improve the communication skills of speaking and listening. - The student will acquire and practice communication, social, interpersonal, and personal competencies. 	

Course contents:

Introduction to interpersonal communication. Models and concepts in communication. Principles of communication. Social and pedagogical communication. Examples of developing communication skills.

2. Communication - definition of pedagogical communication, its content, goals and functions in the educational process. Planes of pedagogical communication. Participants of pedagogical communication. Types of communication.

3. Non-verbal communication in the school environment. Brief characteristics of extralinguistic means. Mimicry, gaze speech, gestures, haptics in the work of the teacher.

4. Nonverbal communication in the work of the teacher. Proxemics, posturing, kinesics, communicating by modifying appearance and environment.

5. Verbal communication in the teacher's work. Language as a tool of pedagogical communication. Proportion of verbal expressions of teacher and pupils. Linguistic aspect of teacher's communicative expression. Communication skills of beginning teachers. Vocal hygiene. Rules of teacher-pupil communication. Monologue. Coherent speech, its preparation and realization. Lecture, explanation of the curriculum.

6. Rhetoric in the work of the teacher. Speech preparation, preparation of the speaker. Audience and sustaining attention. Managing stage fright.

7. Conversation and dialogue in the pedagogical process - their formal and content, the structure of conversation. Questions and answers in teaching. Typology of questions. The teacher's reaction to the pupil's answer.

8. Devaluation and elevation in pedagogical communication. Manifestations of respect, disrespect, humiliation in school. Situations of devaluation and elevation, verbal and non-verbal devaluation, pupil's behaviour and reactions during devaluation, ways of solving and helping in the classroom. Pygmalion and Golem effect. Teacher's mistakes in communication.

9. The art of listening. Listening. Attitudes to listening, types of listeners, ways of listening. Active listening techniques. Inappropriate listener response. Silence in listening.

10. Space in communication. Different ways of arranging the classroom and their relationship to the characteristics of teacher-student communication.

11. Communication with the family, factors facilitating communication with parents. Principles of organizing meetings with parents. Class meetings, consultation hours.

12. Empathy and assertiveness in pedagogical conditions. Education of pupils for empathic and assertive communication.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD116A/22	Course title: Pedagogical assistance 1
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 2 hours per semester: 13 / 26 Teaching method: on-site	
Credits: 5	Working load: 125 hours
Recommended semester/trimester: 4.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: The goal of the subject is to specialise knowledge, skills and eligibility of the student in pedagogical assistance of children and students with special needs and in multidisciplinary collaboration, team care, and also to specifically support and develop a transparent and inclusive process of academic success and mental health. Verifying the level of gained knowledge, skills and competencies of the student is carried through using the „development portfolio of a pedagogue“ which includes: # Elementary outcomes of positions and specifications in inclusive education of children and pupils with special needs # Elementary definition of approaches, pedagogical and expert activities of the multidisciplinary team during collaboration of people involved in school success of children and students across degrees/areas of support # Theory of identifying the needs of pedagogical assistance and participative links # Outcomes of the multidisciplinary team during work with children, pupils with special needs and their supporting community # Self-evaluation of the student – auto-evaluation of knowledge, skills and competencies of the student in the context of pedagogical assistance # Preferred self-development plan within lifelong education After passing the subject, the student will be able to navigate through essential attributes of pedagogical assistance provided to children and pupils with special needs. He will be able to characterize participative approaches of pedagogical and expert activities in the multidisciplinary team across various degrees/areas of support. He will be able to participate in solution and in child and pupil support comprehensiveness solution, ideally so that he actively supports effective interventions within the development of academic success and child/pupil mental health protection. Final evaluation: Evaluation of the portfolio consists of two parts - 1. characteristics of child, pupil, family, school community needs in the context of multidisciplinary collaboration activity and care within pedagogical assistance (40%) and 2. advocacy of the proposed interventions and participative approaches in pedagogical assistance and self-development plan in the context of multidisciplinary support (60%) Subject evaluation:	

A – 100%-93%
B – 92%-85%
C – 84%-77%
D – 76%-69%
E – 68%-60%
Fx – 59%- 0%

Learning outcomes of the course:

- student is able to characterise the identification of children, pupil, family, and staff needs through personalisation, destigmatisation, de-barring and other inclusive mechanisms
- student can choose participative processes of including the people involved into the multidisciplinary support of the child/pupil,
- student knows methods of mapping and identification of needs of people involved from the school community in the context of inclusive support and abilities of the school/school facility
- student understands the processes of child/pupil multidisciplinary support in the context of mental health protection and academic success
- student is able to design his own specific knowledge, competence and eligibility development plan of a key actor in inclusive change

Course contents:

1. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on diversity and values of destigmatisation.
2. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on cognitive/executive development.
3. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing pro-social development.
4. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on the adjustments of educational environment.
5. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on interventions.
6. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on standards of Public work and services.
7. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on co-ordination of multidisciplinary collaboration.
8. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on executing multidisciplinary care.
9. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on evaluation..
10. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on occupation orientation.
11. Outcomes of inclusive specifications with children and pupils with special needs according to the type of needs and support focusing on social inclusion and lifelong development.
12. Multidisciplinary support – development of specific skills of the multidisciplinary team member in the form of observational experience (development plan).
13. Multidisciplinary support – auto-evaluation of specific skills.

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD120A/22	Course title: Pedagogical assistance 2
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 2 hours per semester: 13 / 26 Teaching method: on-site	
Credits: 5	Working load: 125 hours
Recommended semester/trimester: 5.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: The goal of the subject is to practically adopt specialized knowledge, skills and eligibility of the student in pedagogical assistance provided to children and pupils with special needs and to adopt multidisciplinary collaboration, team care, also specifically support during execution, develop participative, transparent and inclusive process of academic success and mental health. Requirements to pass the subject and the method of verifying gained knowledge, skills and competencies: Verifying the level of gained knowledge, skills and competencies of the student is carried through using the „development portfolio of a pedagogue“ which includes: # Defining the position and specifications of children and pupils with special needs in inclusive education # Defining approaches, pedagogical and expert activities of the multidisciplinary team during the collaboration of people involved in academic success of the child and pupil across various degrees/ areas of support # Identifying pedagogical assistance needs and participative links # Value-focused work of the multidisciplinary team during work with children and pupils with special needs and their support community # Self-evaluation part of the student – auto-evaluation of knowledge, skills and competencies of the student in the context of pedagogical assistance # Preferred self-development plan within lifelong education After passing the subject, the student will become a specialist in pedagogical assistance provided to children and pupils with special needs. He will be able to navigate through participative approaches of pedagogical and expert activities in a multidisciplinary team across various degrees/ areas of support. He will know how to actively and meaningfully contribute to solutions and comprehensiveness of child and pupil development support, ideally so that he actively creates and helps effective intervention within the development of academic success and child/pupil mental health protection. Final evaluation: Evaluation of the portfolio consists of two parts – 1. characteristics of child, pupil, family, and school community needs in the context of multidisciplinary collaboration and care activities (40%)	

and 2. practical execution of proposed interventions and participative approaches in pedagogical assistance and the self-development plan in the context of multidisciplinary support (60%).

Subject evaluation:

A – 100%-93%

B – 92%-85%

C – 84%-77%

D – 76%-69%

E – 68%-60%

Fx – 59%- 0%

Learning outcomes of the course:

- student is able to execute the identification of children, pupil, family and staff need by using personalization, destigmatization, de-barring and other inclusive mechanisms
- student is able to initiate and conduct participative processes of involving people involved into multidisciplinary support and child/pupil support,
- student is able to map, identify and characterize the needs of people involved in the school community in the context of inclusive support and the school's/school facility's abilities,
- student is able to establish and personalize multidisciplinary support of a child/pupil in the context of mental health protection and academic success under the methodical worker
- student is able to design his own development plan of specific knowledge, competencies and eligibility as a key person in inclusive change

Course contents:

1. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on diversity and values of destigmatization.
2. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on cognitive/executive development.
3. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on prosocial development.
4. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on úpravy edukačného prostredia.
5. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on interventions.
6. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on the standards upbringing advisory and prevention.
7. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on coordination of multidisciplinary collaboration.
8. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on execution of multidisciplinary care.
9. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on evaluation.
10. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on job orientation.
11. Inclusive specifications of children and pupils with special needs according to the type of needs and support focusing on social inclusion and lifelong development.
12. Multidisciplinary support – development of specific skills of the multidisciplinary team member (development plan) in practicing facility.
13. Multidisciplinary support – auto-evaluation of specific skills

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD113A/22	Course title: Pedagogical diagnosis of the pupil
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 1 hours per semester: 26 / 13 Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 4.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Verification of the student's knowledge of pedagogical diagnostics will consist of a theoretical written examination (100%), for which 100 points can be obtained. A minimum of 93 points is required for an A grade, a minimum of 85 points for a B grade, a minimum of 77 points for a C grade, a minimum of 69 points for a D grade and a minimum of 60 points for an E grade. Course Assessment: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: - the student is able to use the basic terminology of the discipline of pedagogical diagnostics in the context of educational action - the student is able to understand the basic assumptions in the theory and practice of pedagogical diagnostics of children and youth - the student applies the acquired knowledge to the solution of specific problems in the classroom - the student is able to critically assess different approaches and contexts in education and training from the perspective of educational theory - the student is able to evaluate the contribution of educational theory in relation to the potential for personal development of children and young people - the student knows the basic principles of the process of educational management, has an overview of diagnostic methods aimed at an effective educational process	
Course contents: 1. Diagnostics as a part of cognitive, evaluative, categorization and decision-making process in everyday life. General and specific criteria. The meaning of diagnosis. 2. Basic concepts. Diagnosis and diagnosis. Diagnostic conclusions and prognosis. Diagnostic validation. Diagnostic model in the process of education. Stages of the diagnostic process.	

3. Standardized and non-standardized methods of diagnostic tools and methods. Educational and educational standards as an evaluation criterion? Static and dynamic (procedural) model of pedagogical diagnostics.
4. Diagnostics of the child in the educational process. Level of knowledge and skills, will and other personal characteristics, social behavior.
5. Diagnostics in extracurricular and educational process. Hygiene and social habits. Behaviour alone and in groups. Behaviour in stressful situations. Interests. Values and attitudes.
6. Specifics of assessment in the educational and upbringing process. Standards, forms and methods of assessment. The most common errors associated with the cognition and evaluation of the child. Minimisation of errors.
7. Observation (structured, unstructured, random), questionnaire, didactic test, analysis of the child's products, activity diagnostics, projective techniques, etc. Use of diagnostic sheets and scales.
8. Unstructured, semi-structured and structured interview. Quality question formulation as an important part of the teacher's competence.
9. Class (educational group) as an object of diagnostics. Diagnosing the classroom climate. Sociometry - possibilities and risks.
10. Self-diagnosis of the educator. Reflection and self-reflection. Self-diagnostic methods. Diagnostic and self-diagnostic competences of the teacher.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD112A/22	Course title: Prevention of socio-pathological phenomena for pedagogues
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture Recommended study range: hours weekly: 2 hours per semester: 26 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 3.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Prerequisites: During the semester, the student actively works in class, designs and presents preventive activities on the chosen topic in the scope of 1 class period, passes one midterm test and a final written exam. The final grade will be based on the total number of points obtained from the midterm assessment (max. 50 points) and the final written exam (max. 50 points). Course grade: A - 100%-93%, B - 92%-85%, C - 84%-77%, D - 76%-69%, E - 68%-60%, Fx - 59%- 0% Verification of the student's acquisition of the relevant knowledge, skills and competences is based on active work in class, design and presentation of preventive activities on the selected topic in the scope of 1 lesson and written examinations.	
Learning outcomes of the course: Course Objective: The aim of the course is to provide basic theoretical knowledge in the field of socio-pathological phenomena, as well as basic tools for monitoring and diagnosis of problematic and risky behaviour of pupils, intervention and forms and methods of prevention in school and in education outside the classroom. Learning outcomes After completing the course, the student has knowledge in the field of socio-pathological phenomena and prevention in school and education outside the classroom. The student knows the specifics of diverse social groups and risks of the social environment, and is able to plan and implement effective prevention. The student is able to recognise socio-pathological manifestations of pupils' behaviour, as well as risky or problematic behaviour of pupils, and is able to include effective primary prevention activities in the classroom in a targeted manner. Can plan, design and manage the formation of a target group and effectively implement prevention activities. Possess the competences to cooperate effectively with parents, social environment and professionals in the prevention of risky and problematic behaviour of pupils. Is able to record, analyse and deal with diverse pedagogical situations.	

The acquired theoretical knowledge will enable the student to implement effective prevention as well as to deal with problematic and risky behaviour of pupils.
The student will be able to apply the theoretical knowledge to preventive activities with pupils.
He/she can process the acquired knowledge, use it in communication with professionals and in his/her further education.

Course contents:

Brief outline of the course:

1. Basic terminological apparatus (social pathological phenomenon, social deviation, socially undesirable phenomena, normality).
2. Characteristics, historical aspects and current status of social pathological phenomena
3. Etiology of socio-pathological phenomena.
4. Characteristics of the most widespread behavioral problems in children and youth, current trends.
5. Primary, secondary and tertiary prevention, prevention of victimization.
6. EU and Slovak strategic documents in the field of prevention. School documents. Subjects and objects of prevention.
7. The school's position in prevention, forms and methods of prevention, the school's plan of preventive activities. Prevention outside school hours.
8. Effectiveness of prevention. Monitoring of risky and problematic behaviour of pupils.
9. Capacities and competences of pedagogical and professional staff in the field of school prevention. The role of the educator in the prevention of socio-pathological phenomena (e.g., school kindergarten, CVC).
10. School cooperation with professionals in prevention and problem solving.
11. Cooperation of the school with the family in the prevention and resolution of problem behaviour.
12. Addressing behavioural problems in children and young people.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD103A/22	Course title: Prosocial education
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 2 hours per semester: 13 / 26 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 1.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: During the semester, the student demonstrates theoretical knowledge about prosocial behavior, primarily by direct application, within the assigned tasks and exercises. In the interactive twelve-hour training, he has the opportunity not only to acquire new, but also to strengthen already acquired social-emotional skills, which he needs for his didactic practice. Final assessment: cumulative percentage gain on practical skills (100%). Subject evaluation: A – 100%-93% B – 92%-85% C – 84%-77% D – 76%-69% E – 68%-60% Fx – 59%- 0%	
Learning outcomes of the course: The aim of the subject is to provide basic theoretical knowledge and practical skills for ensuring modern prosocial and socio-emotional education in kindergartens, primary and secondary schools. Education results (knowledge, skills and competences): <ul style="list-style-type: none"> - The student will be able to define prosocial factors that enter into the interactions between teacher - child/student - family - and the wider support community. - He will master the methodology of the comprehensive "Safe School" concept. - He will have an overview of all levels and forms of prosocial education and direct social-emotional support of the school community based on the principles of Kids Skills, cooperative management of positive change, multidisciplinary, the PBIS system, etc. - Can identify, self-present and support basic and advanced self-skills, also guide or strengthen the entire educational community in their lifelong training in an appropriate way. - He will be able to flexibly use social-emotional concepts and transform them into lifelong competences in the entire educational process where he directly works. - Will be able to effectively solve problems and conflicts with a solution-oriented approach. - Will be able to design, manage and evaluate a targeted well-being concept/program in kindergartens, primary and secondary schools while respecting diverse individuals and their differences. 	

Verification of the level of acquired knowledge, skills and competences:

Verification of the degree of acquisition of the relevant knowledge, skills and competencies of the student is carried out on the basis of a comparison of the specific competence profile of the student with the profile of the practitioner. As assessment methods, we use: reflection, valid standards and continuous assessment by the teacher.

Course contents:

Prosocial behavior

1. Introduction to the issue;
2. Factors of prosocial education;
3. Self-esteem, self-evaluation;
4. Communication: Appreciative Inquiry;
5. Uniqueness, creativity and initiative;
6. Expression and perception of feelings: empathy, assertiveness;
7. Prosocial patterns: desired, real and unrealistic;
8. Cooperation, co-creation, positive assessment styles;

Social-emotional learning, skills and education in educational practice

1. Module 1 – What is a safe school (well-being)?;
2. Module 2 – Self-management;
3. Module 3 – Kids Skills;
4. Module 4 – Resilience;
5. Module 5 – Relationship skills;
6. Module 5 – Self-evaluation;
7. Module 6 – Inclusive legislation.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD106A/22	Course title: Social Pedagogy
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 1 hours per semester: 26 / 13 Teaching method: on-site	
Credits: 5	Working load: 125 hours
Recommended semester/trimester: 2.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Course completion requirements and method of verification of acquired knowledge, skills and competences: Continuous assessment: case study: 0-10 points, seminar work: 0-15 points, active participation in lectures and exercises: 10 points, continuous test: 0-15. Final assessment: preparation of a practical assignment on a given topic and its submission by e-mail: 0-50 points . Intermediate and final assessment = 100 points in total. The final grade will be based on the total number of points obtained from the mid-term and final assessment. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0% Verification of the student's acquisition of relevant knowledge, skills and competencies is based on active work in class, presentation of seminar work and written examinations.	
Learning outcomes of the course: Course Objective: The aim of the course is to provide basic theoretical knowledge in the field of social pedagogy and the profession of a social pedagogue, so that after completing the course the student has knowledge about social aspects of personality development, knows and understands the process of socialization in broader social science contexts, as well as the issue of socialization disorders and the possibility of prevention. Learning outcomes - The student will understand the nature and causes of the emergence of social pedagogical thinking in Europe in a historical context and its focus in the present. The student will learn the specifics of the emergence and development of social pedagogy in Slovakia. The student is able to characterize the subject of social pedagogy and its relationship to other sciences.	

- Knows the importance of the social environment for human beings and its relationship to education, also knows the specifics of socio-educational work in the family and school, from the aspect of social pedagogy.
- He/she acquires knowledge of the social aspects of individual development. He is able to analyse and distinguish positive and negative influences of the social environment in which pupils live and to propose preventive and compensatory activities to eliminate negative influences.
- Knows and understands the socialisation process in a broader social science context, as well as possible socialisation disorders. Has knowledge of socialisation factors and their impact on the personality of the pupil.
- Applies acquired theoretical knowledge in analysing the impact of socialisation factors on the pupil, especially the family, school, peers and mass media. Applies acquired theoretical knowledge in the analysis of the influence of family and school on the deviant development of the pupil. The student is able to create a socio-pedagogical case study of a pupil with risky or problematic behaviour.
- Is able to assess the occurrence of negative phenomena in the school environment and propose solutions. Can record, analyse and solve diverse pedagogical situations.
- Acquired theoretical knowledge will enable the student to solve problems effectively, manage effective communication with pupils, parents and professionals. The student is able to work effectively as a team member and manage individuals and groups. The student is able to positively modify behavior and personal development.
- He/she is able to process the acquired knowledge and use it in his/her further education.

Course contents:

Brief outline of the course:

Brief development of social pedagogical thinking in Europe up to the 1840s. Selected socio-pedagogical concepts (J. L. Vives, J. H. Pestalozzi, R. Owen, etc.). The influence of sociology on pedagogical thinking from the 1840s onwards. Origin and development of social pedagogy in Europe, theoretical and socio-political reasons for the emergence of social pedagogy, directions of social pedagogy in Germany. The focus of social pedagogy in the 19th and 20th centuries.

Origin and brief development of social pedagogy in Slovakia. Slovak social pedagogy before 1989, in the transition period and at present.

Characteristics and subject of social pedagogy, its understanding in our country and abroad.

Relationship of social pedagogy to social work and leisure time pedagogy.

Social aspects of the environment, the relationship between the environment and education from the aspect of social pedagogy. Influence of the social environment on the emergence of socio-pathological phenomena in children and youth, prophylaxis and compensation of undesirable influences in the social environment.

Socialization. Socialization and education. Socialization factors. Socialization disorders, desocialization, resocialization.

Social aspects of the family. Family as a subject of interest of social pedagogy, social-educational work with family, socialization disorders in family, family and socio-pathological phenomena.

Social aspects of school. Characteristics and functions of school, social-educational work in school from the aspect of the function of social pedagogue, system of educational counselling and prevention in schools and school institutions.

The social pedagogue, his professional competences in schools and school establishments.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KPED/Pg-BD103B/22	Course title: Somatic development of the child
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture Recommended study range: hours weekly: 2 hours per semester: 26 Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 2.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: During the semester, students take one partial test focused on practical skills and at the end of the semester, a final exit written test. The final assessment will be the sum of the points obtained from both tests. Evaluation criteria: The final evaluation will be the sum of the points obtained from the partial (max. 30 points) and final (max. 70 points) written test.	
Learning outcomes of the course: After completing the course Somatic development of the child, the student will acquire the following knowledge, skills and competencies: Acquired knowledge: The student knows the individual stages of human ontogenesis and their critical characteristics The student knows the anatomy and physiology of individual organ systems and their specificities in early ontogeny. The student understands the principles of the biological fundamentals of life-threatening conditions and the consequences resulting from damage to individual systems. Skills Acquired: The student can effectively and creatively apply the acquired knowledge, experience and skills in the teaching profession within the cross-cutting theme of Life and Health Protection in accordance with the NEP ISCED ^o 1, 2 and 3. The student can analyse internal and external factors affecting growth and development. The student can distinguish between pathological factors affecting in the prenatal, perinatal and postnatal period and identify the possibilities of eliminating their effect. The student can integrate and process newly acquired knowledge, information and experience for the healthy development of children in the school environment as well as his own children. Acquired competences: Acquired theoretical knowledge will enable the student to effectively create a healthy living and working environment for the pupils at schools. The student is able to manage his activities, solve problems, coordinate and individualize procedures with regard to the somatic specificities of individual age categories of pupils.	

The student can use the acquired knowledge in emergency situations and also in the context of future teaching profession

Course contents:

1. Individual stages of human ontogenesis
2. Characteristics of somatic stages of human development, early stages of development
3. Processes growth and development and the factors influencing them
4. Characteristics of the structure and function of the skeletal and muscular system and their specifics in early ontogeny
5. Characteristics of the structure and function of the circulatory, respiratory, digestive and urinary system and their specifics in early ontogeny
6. The human regulatory system and its specifics in early ontogeny
7. Human reproductive system, fertilization and factors affecting fertility and the developing fetus
8. Introduction to first aid (legislation, basic principles of first aid, first aid kit requirements)
9. Life-threatening conditions - causes, unconsciousness, disorders of airway patency, acute cardiac events, shock, cardiopulmonary resuscitation
10. Injuries, bleeding and wounds.
11. Intoxication
12. Disorders of the nervous system (convulsions, strokes, mental disorders). Metabolic causes of health damage (hypoglycaemia). Sudden abdominal events.
13. External causes of health damage - burns, frostbite, electric shock, drowning, animal bite
