University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KVV/Vv-MD217A/22	Course title: Art Education Teaching Final Thesis 13
Type and range of planned learning activities and teaching methods: Form of instruction: Seminar Recommended study range: hours weekly: 2 hours per semester: 26 Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 3.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: The study is focused on the ability to apply knowledge in the field of methodology and didactics of art education, art history with application in practice, the ability to apply the acquired knowledge in the field of artistic expression, knowledge of art language, the ability to understand it in the context of application in practice. The study is aimed at mastering and the ability to use art language in various art themes and areas conceptually based on art, language resources, compositional principles, selected art techniques, various materials and processes of art media. At the individual exercises, the student is looking for original and individual ways of solving five selected areas of issues in the field of didactics of art education, methodology of art education and art history processed into twenty tasks through presentations. The most important condition for completing the course is the documentation of creative (artistic-pedagogical) research arising as a series of individual, consecutive steps under the guidance of the providing teacher. Submission of finished products activities and assessment of their quality in the final evaluation is not accepted without the above research. For each of the above tasks, presentation documentation must be prepared for each teaching unit, as an important part of the pedagogical process in joint presentations or consultations. For the final evaluation, the student submits the required number of 20 tasks summarized in 5 presentations, which were created gradually, as a result of the pedagogical process in ten compulsory exercises. Therefore, it is not possible to combine the set exercises into larger units and thus reduce the prescribed number of consultations with the teaching teacher. The condition for the final evaluation of the course is also the completion and submission of all ten sub-tasks with a minimum grade of "E" - no task can be missing or be graded "FX". Course evaluation: A - 100% -93% B - 92% -85% C - 84% -77% D - 76% -69% E - 68% -60% Fx - 59% - 0%	
Learning outcomes of the course:	

The aim of the course is to significantly deepen the knowledge, skills and abilities associated with art education, didactics and methodology of art education, to demonstrate the ability of independent creative work usable in pedagogical practice by applying theoretical and practical knowledge from previous studies.

Learning outcomes:

The course enables students to continue to systematically deepen their knowledge of the topics of art education in the field of individual disciplines of visual arts, art theory, didactics of fine arts and art education. It enables to understand and know how to apply in practice didactic, methodical and artistic procedures, which are the basis for the processes of learning, education, upbringing and artistic creation. The student is able to practically apply and use the acquired knowledge from the theory of art education, from the ways of applying the model of art language, from the methodology of art education and for the needs of the teacher of art education.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KVV/Vv-MD214A/22	Course title: Final work from a selected visual medium
Type and range of planned learning activities and teaching methods: Form of instruction: Seminar Recommended study range: hours weekly: 2 hours per semester: 26 Teaching method: on-site	
Credits: 2	Working load: 50 hours
Recommended semester/trimester: 3.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: Conditions for passing the course and the subject and the method of verification of the acquired knowledge, skills and competences: The study is focused on research and development of a specific topic according to the assignment of the teacher. In the individual exercises, the student tries to define his own artistic opinion on drawing, looking for a unique and individual way of solving ten set tasks so as to achieve a comprehensive and unified author's statement. The most important condition for completing the course is the documentation of creative (artistic-pedagogical) research arising as a series of individual, consecutive steps under the guidance of the providing teacher. Submission of finished works of art and assessment of their quality in the final evaluation is not accepted without the above research. For the final evaluation, the student submits the required amount - 10 tasks, which were created gradually, as a result of the pedagogical process in ten compulsory exercises. Therefore, it is not possible to combine the set exercises into larger units and thus reduce the prescribed number of consultations with the teacher. The condition for the final evaluation of the course is also the completion and submission of all ten sub-tasks with a minimum grade of "E" - no task can be missing or be graded "FX". Course evaluation: A - 100% -93% B - 92% -85% C - 84% -77% D - 76% -69% E - 68% -60% Fx - 59 % - 0%	
Learning outcomes of the course: acquire abilities, knowledge and skills for independent creative pedagogical work in field of study teacher of fine arts - to master and develop the concepts of the methodology of art education for the pedagogical practice of the student.	

- to continue smoothly in the systematic deepening of knowledge in the field of methodology of art education related to the field of art language, grammar of visual forms, expressive elements, means and laws of construction of works of art
- the aim of the course is to combine classical and interdisciplinary principles of creation, to develop creativity for the needs of the production of art artifacts within the methodology of art education
- can acquire the acquired knowledge for the pedagogical needs of an art teacher.

Course contents:

Course contents:

1. Introduction to the issue of surface art disciplines. To acquaint students with the nature of tasks focused on the use of abstract painting principles and their use in composition.
2. Problem number 1. The student sets his / her own topic in connection with the general art disciplines completed in previous semesters. The student uses various painting techniques and means of expression focused on the abstract expression of the painting treatment of the area. Solution concepts, A5, A4 formats.
3. task number 2. Developing the topic from the previous task with the use of painting techniques (for example, spraying paint, working with stencils, printing techniques (author's), use of xerography, dripping , innovations in current trends in ink media, combinations of oil and water thinners, invasive interventions in the surface, compositions, cutting, perforations and others) Use mainly their own authorial research techniques, tests of various background materials, overlaps in drawing, graphics, photography, experiment, formats A3, A2.
4. Task number 2. Developing the topic from the previous task with the use of painting techniques (for example, spraying paint, working with stencils, printing techniques (author's), use of xerography, dripping , innovations in current trends in ink media, combinations of oil and water thinners, invasive interventions in the surface, compositions, cutting, perforations and others) Use mainly their own authorial research techniques, tests of various background materials, overlaps in drawing, graphics, photography, experiment, formats A3, A2.
5. Task 2. Development of the topic from the previous task with the use of painting techniques (for example, spraying paint, working with stencils, printing techniques (author's), use of xerography, dripping , innovations in current trends in ink media, combinations of oil and water thinners, invasive interventions in the surface, compositions, cutting, perforations and others) Use mainly their own authorial research techniques, tests of various background materials, overlaps in drawing, graphics, photography, experiment, formats A3, A2.
6. Task number 2. 8. Task number 2. Developing the topic from the previous task with the use of painting techniques (for example, spraying paint, working with stencils, printing techniques (author's), the use of xerography, dripping , innovations in current trends in ink media, combinations of oil and water thinners, invasive interventions in the surface, compositions, cutting, perforations and others) Use

mainly their own authorial research techniques, tests of various background materials, overlaps in drawing, graphics, photography, experiment, formats A3, A2.

9. Task number 2. Developing the topic from the previous task with the use of painting techniques (for example, spraying paint, working with stencils, printing techniques (author's), use of xerography, dripping , innovations in current trends in ink medium handling, combinations of oil and water thinners, invasive interventions into the surface, compositions, cutting, perforations and others) Use mainly their own authorial research techniques, tests of various background materials, overlaps in drawing, graphics, photography, experiment, formats A3, A2. Partial assessment of the achieved results of the consultation, change of materials, preparation for larger A1 formats and larger.

10. Task number 2. Developing the topic from the previous task with the use of painting techniques (for example, spraying paint, working with stencils, printing techniques (author's), use of xerography, dripping , innovations in current trends in ink media, combinations of oil and water thinners, invasive interventions in the surface, compositions, cutting, perforations and others) Use mainly their own authorial research techniques, tests of various background materials, overlaps in drawing, graphics, photography, experiment, formats A3, A2. Finalization of results created during the semester, completion of larger formats.

11. Task number 2. Developing the topic from the previous task with the use of painting techniques (for example, spraying paint, working with stencils, printing techniques (author's), use of xerography, dripping , innovations in current trends in ink media, combinations of oil and water thinners, invasive interventions in the surface, compositions, cutting, perforations and others) Use mainly their own authorial research techniques, tests of various background materials, overlaps in drawing, graphics, photography, experiment, formats A3, A2. Finalization of results created during the semester, completion of larger formats.

12. Recapitulation of works created during the semester, joint evaluation of results, self-evaluation of students in the achieved author's programs.

13. Final summary, joint evaluation of achieved results, public presentation.

Recommended semester/trimester: 2.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: The study is focused on research and development of (one) specific topic according to the student's choice. At the individual exercises, the student tries to define his own art program, looking for a unique and individual way of solving ten set tasks so as to achieve a comprehensive and unified author's statement in both formal and content terms. The most important condition for completing the course is the documentation of creative (artistic-pedagogical) research arising as a series of individual, consecutive steps under the guidance of the providing teacher. Submission of finished works of art and assessment of their quality in the final evaluation is not accepted without the above research. For each of these tasks, photographic documentation must be prepared for each teaching unit, as an important part of the pedagogical process in joint presentations or consultations. For the final evaluation, the student submits the required amount - 10 tasks, which were created gradually, as a result of the pedagogical process in ten compulsory exercises. Therefore, it is not possible to combine the set exercises into larger units and thus reduce the prescribed number of consultations with the teaching teacher. The condition for the final evaluation of the course is also the completion and submission of all ten sub-tasks with a minimum grade of "E" - no task can be missing or be graded "FX".	
Learning outcomes of the course: The aim of the course is to acquire theoretical and practical knowledge and skills in the field of plastic art disciplines from the end of the 20th century to the present. Mastery of individual concepts, approaches and procedures, search and creative, artistic development of individual visual forms and artistic means of expression. Learning outcomes: - acquire abilities, knowledge and skills for independent creative pedagogical work in fine arts teacher - to master and develop the concepts of the methodology of art education for the pedagogical practice of the student - to continue to systematically deepen the knowledge in the field of art education methodology concerning the field of art language, grammar of visual forms, expressive elements, means and regularities of construction of works of art

Level of study: II.	
Prerequisites:	
Requirements for passing the course: The study is focused on research and development of specific topics as assigned by the teacher. At the individual exercises, the student tries to define his own art program, looking for a unique and individual way of solving ten set tasks so as to achieve a comprehensive and unified author's statement in both formal and content terms. The most important condition for completing the course is the documentation of creative (artistic-pedagogical) research arising as a series of individual, consecutive steps under the guidance of the providing teacher. Submission of finished works of art and assessing their quality in the final evaluation is not accepted without that research. For each of these tasks, photographic documentation must be prepared for each teaching unit, as an important part of the pedagogical process in joint presentations or consultations. For the final evaluation, the student submits the required amount - 10 tasks, which were created gradually, as a result of the pedagogical process in ten compulsory exercises. Therefore, it is not possible to combine the set exercises into larger units and thus reduce the prescribed number of consultations with the teaching teacher. The condition for the final evaluation of the course is also the completion and submission of all ten sub-tasks with a minimum grade of "E" - no task can be missing or be graded "FX".	
Learning outcomes of the course: The aim of the course is to present theoretical and practical knowledge and skills in the field of art disciplines. Mastery of individual concepts, approaches and procedures, search and creative, artistic development of individual visual forms and artistic means of expression. Learning outcomes: Acquire abilities, knowledge and skills for independent creative pedagogical work in the field of study art teaching. Acquire and develop the concepts of art education methodology for the student's pedagogical practice. It continued to systematically deepen knowledge in the field of art education methodology concerning the field of art language, grammar of visual forms, expressive elements, means and regularities of construction of works of art. The aim of the course is to combine classical and interdisciplinary principles of creation, to develop creativity for the needs of the production of art artifacts within the methodology of art education. To be able to apply the acquired knowledge in the pedagogical needs of an art teacher.
