## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD117A/22	<b>Course title:</b> Basics of expressive therapies and therapeutic approaches
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 2 / 2 <b>hours per semester:</b> 26 / 26 <b>Teaching method:</b> on-site	
<b>Credits:</b> 5	<b>Working load:</b> 125 hours
<b>Recommended semester/trimester:</b> 4.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Prerequisites for successful completion of the course: 1. active participation in seminars, making concrete proposals within the framework of a support program for individuals with intellectual and other disabilities; 2. design and partial validation of a support program in a specific group of individuals with disabilities; 3. oral examination of knowledge of therapeutic approaches in a selected group of individuals with intellectual or other disabilities. A minimum of 93% is required to receive a grade of A, a minimum of 85% is required to receive a grade of B, a minimum of 77% is required to receive a grade of C, a minimum of 69% is required to receive a grade of D, and a minimum of 60% is required to receive a grade of E. Course Assessment: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%-0%	
<b>Learning outcomes of the course:</b> Course Objective: The student will be able to apply therapeutic approaches and techniques for a target group of individuals with intellectual disabilities and through specific means identify real problems and subsequent solution options with implementation into the educational process. Learning Outcomes: Upon completion of the course, the student will acquire the following knowledge, skills and competencies: - Gain basic knowledge of therapeutic approaches, their possibilities and limitations when working with individuals with intellectual disabilities;	

- be able to apply the knowledge in understanding counselling as part of counselling activities and at the same time consider it as part of a comprehensive social rehabilitation;
- Can analyze, synthesize, and compartmentalize mediated information about the use of expressive therapies and therapeutic approaches;
- be able to develop a support programme using elements of a specific therapeutic approach;
- master the basic approaches to conducting individual consultations and group sessions;
- Can differentially select appropriate approaches within expressive and therapeutic approaches when working with an individual and his/her family.

#### **Course contents:**

Basic definition of expressive therapies and therapeutic approaches. Therapies in special education. Procedural aspect of therapy. Means of therapy. Classification and basic description of therapies in special education. Resources of the therapeutic community. Psychodynamic and cognitive-behavioral approaches. The therapeutic community as a system of work of the institution. Structural elements of the system. Ceremonies, rituals and traditions as part of therapeutic approaches and community identity building. Assessment activities and practices in the therapeutic-educational process.

There will be a written test during the semester: a minimum of 93% is required for a grade of A, a minimum of 85% is required for a grade of B, a minimum of 77% is required for a grade of C, a minimum of 69% is required for a grade of D, and a minimum of 60% is required for a grade of E. Course Assessment: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%-0%	
<b>Learning outcomes of the course:</b> <b>Course Objective:</b> The aim of the course is to provide a basic theoretical and practical background towards strategies and support for individuals with disabilities in the special education process. <b>Learning Outcomes:</b> Upon completion of the course, the student will have the following knowledge, skills and competencies: - The student will gain a basic theoretical understanding of specific strategies when working with individuals with disabilities, disruptions and threats; - the student will acquire basic knowledge about the use of specific strategies when working with individuals with disabilities, disruptions and threats;	

- will be well versed in the system of special educational guidance focusing on the possibilities and limits of individuals with disabilities at different stages of ontogenetic development;
- acquire basic knowledge of intervention for individuals with disabilities, disruptions and threats.

#### **Course contents:**

Fundamentals of strategies and support for individuals in the special education process - an introduction to the issue, theoretical background. Differentiation of strategies in the intervention and counselling process. The practice of strategies in the special-educational process.

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD113A/22	<b>Course title:</b> Case study seminar
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 1 / 3 <b>hours per semester:</b> 13 / 39 <b>Teaching method:</b> on-site	
<b>Credits:</b> 5	<b>Working load:</b> 125 hours
<b>Recommended semester/trimester:</b> 3.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Prerequisites for successful completion of the course: 1. 1; 2. elaboration of a case study of a specific child/pupil with intellectual or multiple disabilities; 3. a final oral examination. There will be a written test during the semester: a minimum of 93% is required for a grade of A, a minimum of 85% for a grade of B, a minimum of 77% for a grade of C, a minimum of 69% for a grade of D, and a minimum of 60% for a grade of E. Course Assessment: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%-0%	
<b>Learning outcomes of the course:</b> <b>Course Objective:</b> The goal of the course is to learn the basics of case management and to create a case report based on individual information about an individual with an intellectual disability. <b>Learning Outcomes:</b> Upon completion of the course, the student will acquire the following knowledge, skills and competencies: - Acquire basic theoretical knowledge related to the creation of a client case report (from early age to old age); - to analyse, synthesize and compile the obtained information into a coherent case report; - be able to create a case report on the basis of information about a given individual with an intellectual disability from the position of a special educator; - discusses ethics in the use of casework in the work of the special educator;	

- can argue the importance and relevance of using the causal method in special education diagnosis;
- applies practical experience in the use of the causal method in the analysis of causal cases;
- be able to assess the strengths and weaknesses of an individual with a disability, disruption and threat based on the evidence forming a specific case study.

**Course contents:**

Basic definition of case report (terminological definition of case report, objectives of case report). Types of case reports. Objectives of case report. Approaches in case report. Attributes and functions of case reports. Structure of case reports. Case approach and case strategy. Case method. Use of observation (structured, unstructured) based on still images. Autocasualty. Client-centred case study. The use of special-educational case-work. The ethics of the special educator's causal work. The use of case studies in the educational process, in counseling, in occupational and social rehabilitation. Presentation of selected case studies.

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD112A/22	<b>Course title:</b> Diagnostics and prognosis in special pedagogy and pedagogy of the mentally disabled
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 2 / 3 <b>hours per semester:</b> 26 / 39 <b>Teaching method:</b> on-site	
<b>Credits:</b> 6	<b>Working load:</b> 150 hours
<b>Recommended semester/trimester:</b> 3.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Conditions for successful completion of the subject: 1. Submission of ongoing semester papers; 2. processing a review focused on the life of a person/family with a disability, impairment and threat; 3. final oral examination. During the semester, there will be a written test: to get an A grade you need to get at least 93%, to get a B grade at least 85%, for a C grade at least 77%, for a D grade at least 69% and for an E grade at least 60%. Subject evaluation: A – 100%-93% B – 92%-85% C – 84%-77% D – 76%-69% E – 68%-60% Fx – 59%-0%	
<b>Learning outcomes of the course:</b> The aim of the subject is to know the basic starting points and possibilities regarding special pedagogical diagnostics in connection with the assessment and classification of children/pupils with mental disabilities. Learning outcomes: After completing the subject, the student will acquire the following knowledge, skills and competences: - acquires adequate theoretical knowledge and practical skills in the field of special pedagogical diagnostics; - knows specific methods in special pedagogical diagnostics and their use in the profession of a special pedagogue. - knows how to characterize specific properties of diagnostic methods and their use in a practical dimension;	

- can select and apply appropriate diagnostic methods with regard to a specific target group;
- will be able to carry out special-pedagogical diagnostics in individual periods of development of an individual with disabilities, disturbances and threats.

**Course contents:**

Theoretical foundations of special pedagogic and pedagogical diagnostics. A brief history of pedagogical and special pedagogical diagnostics. Tasks and goals of special pedagogical diagnostics. Methods and process of pedagogical and special pedagogical diagnostics. Characteristics of selected methods – observation, exploratory methods, case study, test methods, analysis of activity results. Psychometric properties of diagnostic methods - objectivity, reliability, validity and standardization. Content page of special pedagogical diagnostics. Special pedagogical diagnostics with regard to individual types of disabilities and disturbances. Special pedagogical diagnostics in individual periods of development. Determining the level of motor skills and self-care. Detection of laterality. Motor tests - characteristics, classification. Dynamic practice. Ozeretsky scale. Hetzt-test – methodology, application possibilities of use in diagnostics and prevention. Perceptual tests (Frostig test of visual perception). Detection of communication. Use of diagnostic results in practice. Consequences of special educational needs on the student's educational process. Diagnostics in relation to facilitating the student's adaptation to the school environment. Diagnosis of social interactions in the classroom, relationships between students and classroom climate. Evaluation, classification of pupils with special educational needs.

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD105A/22	<b>Course title:</b> General and developmental psychology
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 2 / 2 <b>hours per semester:</b> 26 / 26 <b>Teaching method:</b> on-site	
<b>Credits:</b> 7	<b>Working load:</b> 175 hours
<b>Recommended semester/trimester:</b> 2.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Continuous assessment: active work on exercises consisting in creative solution of assigned tasks aimed at the development of critical thinking and application of psychological knowledge, min. 80% participation in exercises. The student may obtain a maximum of 30 points in the intermediate assessment phase. Final assessment: a final written examination from which the student may obtain a maximum of 70 points. The final grade will be the sum of the points obtained in the interim assessment and the final written examination. A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
<b>Learning outcomes of the course:</b> Course Objective: Systematization of knowledge in the field of general and developmental psychology with regard to their application in the educational process of children and youth. After completing the course the student will acquire the following knowledge, skills and competences: <b>Knowledge:</b> The student will acquire the theoretical and methodological foundations of general psychology, thus gaining the prerequisites for understanding and studying other psychological disciplines. The student will acquire theoretical knowledge concerning the background, laws and specifics of psychological development of children and adolescents. <b>Skills:</b> The student will be able to adequately and creatively apply the acquired knowledge of cognitive, emotional, social and moral development of children and youth in the educational process. He/she adapts the process of education and training to the level of psychological development of pupils and, in relation to it, chooses teaching objectives, strategies and methods. <b>Competencies:</b>	

<p>The student is competent to use the acquired psychological knowledge and skills in solving practical tasks arising from educational practice. He/she is oriented in the laws of psychological development, also in the specifics of children's play and children's drawing, which he/she is able to analyze and adequately evaluate. Can apply psychological knowledge in solving problems of educational practice.</p>
<p><b>Course contents:</b></p> <p>Psychology as a scientific discipline, the basic concepts of general psychology, the subject of psychology in terms of its main directions. Perception and sensory cognition, attention. Cognitive processes (thinking and imagination: forms of thinking, thought operations, problem solving, intelligence). Cognitive processes (learning and memory: models of memory, childhood amnesia, forgetting and its causes). Motivation (complex theories of motivation, social motives) and emotions. Language and speech. The subject and basic concepts of developmental psychology, laws of development, principles of contemporary developmental psychology. Periodization of development, description of the characteristics of sub-periods (prenatal development, neonatal period, infant, toddler, preschool child development). Periodisation of development, description of the characteristics of the sub-periods (junior school age pubescence and adolescence). Theories of psychological development (social development, factors of socialisation, school maturity, moral development). Theories of psychological development (cognitive development, development of children's play and drawing). Theories of psychological development (personality development, speech and communication development).</p>

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KPED/ ULCA-BD01C/22	<b>Course title:</b> Learner-centred Approach 1
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture <b>Recommended study range:</b> <b>hours weekly:</b> 2 <b>hours per semester:</b> 26 <b>Teaching method:</b> on-site	
<b>Credits:</b> 2	<b>Working load:</b> 50 hours
<b>Recommended semester/trimester:</b> 3.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Self-assessment of the student - 50% - Final assessment Based on the self-assessment questionnaire, the student will evaluate his strengths and weaknesses and outline a plan for his further development. Active participation and work in classes - 50% - Continuous assessment Responsible teachers will assess the attendance, the level of readiness for the lesson and the level of active involvement in teaching.	
<b>Learning outcomes of the course:</b> The aim of the course is to acquaint students with the process of forming a learner-centered approach and its basic principles, and also to point out the benefits of using this approach in the teaching process. The student knows and controls the basic features and principles of humanization. The student knows the basic theoretical basis of the learner-centered approach and its main principles. The student is able to evaluate the contribution of psychological-pedagogical and neuroscience disciplines for the learner-centered approach. The student knows the patterns of psychological development of the student at the appropriate age and identifies the individual characteristics of the student in the classroom. The student knows the basics and principles of neuroscience, can specify and distinguish individual parts of the nervous system for individual cognitive and affective processes, can apply the principles of neuroscience to increase attention and learning ability. The student is acquainted with the basic principles of Rogers psychology and its importance for the teaching process. The student recognizes and identifies the differences between traditional teaching and learner-centered teaching. The student knows the main principles of the learner-centered approach and is able to characterize their nature and importance for the teaching process. The student is able to master the principles of the learner-centered approach and under the guidance of the tutor to improve in the appropriate didactic skills.	
<b>Course contents:</b>	

1. Humanization and application of its principles in the field of education
2. Basic characteristics of a learner-centered approach
3. The main theoretical basis of the learner-centered approach: humanistic learning theory, constructivism
4. Learner-centered approach in the background of knowledge of development psychology and neuroscience
5. Use of neuroscience knowledge in the teaching process: basic principles; attention, learning and memory; emotions and learning, stress in the classroom
6. Carl Rogers and the learner-centered approach
7. Basic principles of learner-centered approach
8. Learner-centered approach and "traditional approach" in education
9. The teacher's path to learning the learner-centered approach (balance between teaching approaches - TDA; CCA; LCA; subjective learning and teaching theory; student knowledge)

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KPED/ ULCA-BD02C/22	<b>Course title:</b> Learner-centred Approach 2
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture <b>Recommended study range:</b> <b>hours weekly:</b> 2 <b>hours per semester:</b> 26 <b>Teaching method:</b> on-site	
<b>Credits:</b> 2	<b>Working load:</b> 50 hours
<b>Recommended semester/trimester:</b> 4.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b> KPED/ULCA-BD01C/22	
<b>Requirements for passing the course:</b> Active participation in lectures and classes - 50% - Continuous assessment during the semester Supervising of the responsible pedagogues Self-assessment of the student - 50% - Final assessment at the end of the semester The student assesses in writing his level of mastery and application of the presented principles of the learner-centered approach.	
<b>Learning outcomes of the course:</b> The aim of the course is to develop the didactic competencies and skills of teacher training students in the teaching process so that they know and master the basic principles of the learner-centered approach. The subject is aimed at making future teachers aware that the teaching process should be aimed at facilitating active learning for students and to know and be able to use methods that support active learning. Furthermore, to know the basic principles of adapting the content of teaching in learner-centered teaching and to be able to place adequate emphasis on cognitive and affective factors in the learning process. The student knows the first three basic principles of a learner-centered approach: active learning; teaching content; cognitive and affective domains. Knows and uses basic teaching methods that support active student learning. Knows and uses tasks that enable active discovery in learning: problem solving, brainstorming, discussions, experimentation, activity and experiential learning, research activities, reading comprehension. He/she knows how to provide support to students (scaffolding); is able to use means to support students' curiosity and imagination; masters modern information and presentation technologies to support student's learning. He/she knows and knows how to use approaches aimed at structuring and modifying learning content so that it is meaningful and relevant for students. Is able to create space and lead students to personalize the learning content; to effectively construct their own knowledge system; to apply the acquired theoretical knowledge in practice and in the lives of students; to use the acquired theoretical knowledge to develop students' skills and competencies; can provide students with a comprehensive view of the content of the curriculum. Knows the function of affective factors (motivation, emotions, needs, interests, attitudes, personality of students) in increasing the effectiveness of learning; knows the means and methods to increase motivation to learn the subject.	

Can use means and methods to increase motivation to learn a given subject; can place a balanced emphasis on cognitive (perception, thinking, memory, attention, speech) and affective processes. Knows and is able to develop higher cognitive processes (analysis, synthesis, evaluation); is able to lead students to understand the context; can stimulate the development of students' critical thinking and ability to work scientifically; can respect the needs, interests, emotions, attitudes and opinions of students in teaching; knows methods and strategies for developing students' metacognitive awareness (self-knowledge - learning styles and strategies, individual peculiarities).

**Course contents:**

1. Facilitation of active learning in a Learner-centered approach
2. Active learning methods in education
3. The question of the content of teaching in traditional teaching and in the learner-centered approach
4. The advisability of the teaching content
5. Relevance of the teaching content
6. Personalization of the teaching content
7. Teaching materials and quality of teaching content
8. The synergy of cognitive and affective factors in the learner-centered approach
9. Affective factors of learning: motivation, needs, interests, attitudes and opinions of students
10. Affective factors of learning: personal problems, current feelings and students' experiences; stagefright, fear, worries and anxiety

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok		
<b>Faculty:</b> Faculty of Education		
<b>Course code:</b> KPED/ ULCA-BD03C/22		<b>Course title:</b> Learner-centred Approach 3
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture <b>Recommended study range:</b> <b>hours weekly:</b> 2 <b>hours per semester:</b> 26 <b>Teaching method:</b> on-site		
<b>Credits:</b> 2		<b>Working load:</b> 50 hours
<b>Recommended semester/trimester:</b> 5.		
<b>Level of study:</b> I.		
<b>Prerequisites:</b> KPED/ULCA-BD02C/22		
<b>Requirements for passing the course:</b> Active participation in lectures and classes - 50% - Continuous assessment during the semester Supervising of the responsible pedagogues Self-assessment of the student - 50% - Final assessment at the end of the semester The student assesses in writing his level of mastery and application of the presented principles of the learner-centered approach.		
<b>Learning outcomes of the course:</b> The aim of the course is to develop the didactic competencies and skills of teacher students in the teaching process so that they know and master the basic principles of a learner-centered approach - specifically building and developing the atmosphere and relationships in the classroom; understanding and developing their role as a teacher and properly understanding, accepting and supporting the role of the student in the classroom. Knows the theoretical background and the essence of the basic principles of learner-centred approach: the atmosphere and relationships in the classroom; the role of teacher and the role of student. He/she knows the factors affecting the social climate and positive learning atmosphere in the classroom. Can create a positive social climate in the classroom without stress and frustration; knows how to support the development of positive relationships with students and classmates; is able to create conditions for the development of cooperation and teamwork instead of individual competition; is able to fully accept students with their individual peculiarities, reveal their strengths and through them develop the potential of students in a given subject; can maintain natural discipline in the classroom. He knows the methodological guidelines for evaluation and pedagogical-psychological regularities of the use of reward and punishment. Can use assessment tools that strengthen inner motivation, create a positive image of oneself, self-assurance and adequate self-confidence of students; is able to lead students to critical-analytical self-reflection and self-evaluation and evaluation of classmates' performance. He/she knows the methods and strategies for facilitating effective learning of students. He/she knows the rules of creating positive relationships with students and natural authority.		

Can effectively facilitate students' learning so that they optimally develop knowledge, skills and competences within their potential; can create a space for students to express their points of view and attitudes openly; knows methods and strategies for developing students' metacognitive awareness (self-knowledge - learning styles and strategies, individual peculiarities); knows how to enable students to participate in classroom decisions so as to develop their independence and responsibility for their learning.

**Course contents:**

1. Atmosphere and classroom relationships in a learner-centered approach - theoretical background
2. Positive teacher attitude, use of humor and games in learner-centred approach
3. Classroom relationships in learner-centred approach
4. Assessment in learner-centred approach
5. Undesired events in the classroom in learner-centred approach
6. The role of the teacher in learner-centred approach: teacher as facilitator, coach and advisor, partner, role model
7. The teacher's relationship to himself, his personal preconditions and "well being"
8. Teacher's cooperation with parents in learner-centred approach
9. Student's participation in decision-making in learner-centred approach
10. Students' autonomy in learner-centred approach

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD116A/22	<b>Course title:</b> Legislative documents in special pedagogy
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 2 / 2 <b>hours per semester:</b> 26 / 26 <b>Teaching method:</b> on-site	
<b>Credits:</b> 5	<b>Working load:</b> 125 hours
<b>Recommended semester/trimester:</b> 4.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Prerequisites for successful completion of the course: 1. Preparation of a legislative document with an emphasis on the needs of a specific school for children and pupils with intellectual disabilities. 2. Final group colloquium. There will be a written test during the semester: an A grade requires at least 93%, a B grade requires at least 85%, a C grade requires at least 77%, a D grade requires at least 69%, and an E grade requires at least 60%..	
<b>Learning outcomes of the course:</b> Upon completion of the course the student will acquire the following knowledge, skills and competences: - master the knowledge related to school policy issues in the Slovak Republic; - can describe international conventions, treaties and declarations in terms of care for people with disabilities; - be able to define and interpret legislation on the education and training of children and young people with intellectual disabilities in institutions where the educational process of individuals with intellectual disabilities takes place. - is able to apply theoretical knowledge for the benefit of education and training of individuals with disabilities	
<b>Course contents:</b> Professional qualification to perform as a special educator. Preparation for the performance of work in education, health care, in the Department of Social Affairs and Family. Legislative documents. Characterize the concepts of social norms, moral norms, legal norms, clarify the essence of these norms. Explain the concept of 'generally binding legislation'. Fundamental rights in Slovakia - the Charter of Fundamental Rights and Freedoms, the Constitution of the Slovak Republic. Historical overview of school laws from the perspective of the disabled. Basic characteristics of international conventions, treaties and declarations from the perspective of care of persons with disabilities :	

Declaration of the Rights of Persons with Disabilities b/ Universal Declaration of Human Rights, c/ Standard Rules for the Creation of Equal Opportunities for Persons with Disabilities. Convention on the Rights of the Child. Establishment of schools and school facilities in terms of the provisions of Act No. 596/2003 Coll. Education and training of children and pupils with special educational needs in terms of Act No. 245/2008 Coll.- .State educational programme and school educational programme, educational programme - basic characteristics. Education of children and pupils with mental disabilities in terms of the relevant provisions of the Act - current legislation. Primary school for pupils with mental disabilities - special primary school, organization, educational programme, internal division, length of education. Practical school - organisation, educational programme, level of education. Pedagogical staff, professional staff, categories of pedagogical staff, pedagogical activity, qualification prerequisites for the performance of pedagogical activity.

**Recommended or required literature:**

1. Applicable pedagogical and legal standards (updated at the beginning of the semester).
2. Vyhláška č. 322/2008 Z. z o špeciálnych školách.
3. Vyhláška č.437/2009 Z. z. ktorou sa ustanovujú kvalifikačné predpoklady a osobitné kvalifikačné požiadavky pre jednotlivé kategórie pedagogických zamestnancov a odborných zamestnancov.
4. Zákon č. 245/2008 Z. z. o výchove a vzdelávaní.
5. Zákon č.317/2009 Z. z. o pedagogických a odborných zamestnancoch.

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD106B/22	<b>Course title:</b> Multisensory and sensory approaches
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 1 / 3 <b>hours per semester:</b> 13 / 39 <b>Teaching method:</b> on-site	
<b>Credits:</b> 4	<b>Working load:</b> 100 hours
<b>Recommended semester/trimester:</b> 4.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Conditions for successful completion of the subject: 1. active participation in seminars, fulfillment of conditions max. 2 excused absences, 2. development and presentation of a case study of a child/pupil in whom some of the multisensory or sensorimotor approaches are applied. 3. final oral examination. At least 93% must be obtained to obtain an A grade, at least 85% to obtain a B grade, at least 77% for a C grade, at least 69% for a D grade, and at least 60% for an E grade. Subject evaluation: A – 100%-93% B – 92%-85% C – 84%-77% D – 76%-69% E – 68%-60% Fx – 59%-0%	
<b>Learning outcomes of the course:</b> The aim of the course is to gain basic theoretical and practical knowledge about individual multisensory and sensorimotor approaches, their starting points, sensory processing and motor functions in children/pupils with SEN and ID. After completing the subject, the student will acquire the following knowledge, skills and competences: - has basic knowledge about neuroplasticity and its functioning - knows individual aspects of sensory dysfunctions and motor differences in different target groups - knows individual multisensory and sensorimotor approaches, the principles of working with them and the possibilities of their application for different target groups.	
<b>Course contents:</b>	

Theoretical foundations of multisensory and sensorimotor approaches, neuroplasticity, and the foundations of neurophysiology in relation to motor and sensory processing, disorders of sensory processing and practice, characteristics of individual multisensory and sensorimotor approaches (Snoezelen, sensory integration, mototherapy, psychomotor therapy, BHRG model), approaches that consider sensory and motor differences (DIRFloortime, Play wisely), sensory strategies and their application in the educational process of children and pupils with SEN and ID.

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD110A/22	<b>Course title:</b> Pedagogical and social communication
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 1 / 2 <b>hours per semester:</b> 13 / 26 <b>Teaching method:</b> on-site	
<b>Credits:</b> 4	<b>Working load:</b> 100 hours
<b>Recommended semester/trimester:</b> 3.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> During the semester, the student demonstrates his/her theoretical knowledge of social and pedagogical communication by active participation in communication activities, games, pantomimes, etc. He/she performs a micro-output according to the recommendation: examples of developing communication skills (a narration limited by a set time and presented in front of a group), in which he/she demonstrates his/her acquired and improved verbal and non-verbal skills. Is capable of self-reflection and self-assessment, and can respond appropriately to peer feedback.	
<b>Learning outcomes of the course:</b> <ul style="list-style-type: none"> <li>- The student will be able to define the basic terminology of social and pedagogical communication.</li> <li>- The student will be able to list and understand the elements of verbal and non-verbal communication and will know the methodology of their use in school practice.</li> <li>- He/she will have knowledge of the use of empathic and assertive communication in school, he/she will be able to use correctly some techniques of non-violent communication in relationships in the educational environment.</li> <li>- The student will be able to conduct monologue and dialogue in the classroom, appropriately form and verbalize questions, and respond to student responses.</li> <li>- Practically and creatively handle communication teaching situations.</li> <li>- He/she will be able to implement meetings with parents through experiential communication activities, to develop school and family cooperation.</li> <li>- Will be able to deal appropriately with devaluing communication problems in the classroom.</li> <li>- He/she will review and improve the communication skills of speaking and listening.</li> <li>- The student will acquire and practice communication, social, interpersonal, and personal competencies.</li> </ul>	
<b>Course contents:</b> Introduction to interpersonal communication. Models and concepts in communication. Principles of communication. Social and pedagogical communication. Examples of developing communication skills. Communication - definition of pedagogical communication, its content, goals and functions in the educational process. Planes of pedagogical communication. Participants of pedagogical communication. Types of communication.	

<p>Non-verbal communication in the school environment. Brief characteristics of extralinguistic means. Mimicry, eye gaze speech, gestures, haptics in the work of the teacher. Proxemics, posturing, kinesics, communicating by modifying appearance and environment.</p> <p>Verbal communication in the teacher's work. Language as a tool of pedagogical communication. Proportion of verbal expressions of teacher and pupils. Linguistic aspect of teacher's communicative expression. Communication skills of beginning teachers. Vocal hygiene. Rules of teacher-pupil communication. Monologue. Coherent speech, its preparation and realization. Lecture, explanation of the curriculum.</p> <p>Rhetoric in the teacher's work. Preparation of a speech, preparation of a speaker. Audience and sustaining attention. Managing stage fright.</p> <p>Conversation and dialogue in the pedagogical process - their form and content, the structure of conversation. Questions and answers in teaching. Typology of questions. The teacher's reaction to the pupil's answer.</p> <p>Devaluation and elevation in pedagogical communication. Manifestations of respect, disrespect, humiliation in school. Situations of devaluation and elevation, verbal and non-verbal devaluation, behaviour and reactions of the pupil during devaluation, ways of solving and helping in the classroom. Pygmalion and Golem effect. Teacher's mistakes in communication.</p> <p>The art of listening. Listening. Attitudes to listening, types of listeners, ways of listening. Techniques of active listening. Inappropriate listening responses. Silence in listening.</p> <p>Space in communication. Different ways of arranging the classroom and their relationship to the characteristics of teacher-student communication.</p> <p>Communication with the family, factors facilitating communication with parents. Principles of organizing meetings with parents. Class meetings, consultation hours.</p> <p>Empathy and assertiveness in pedagogical conditions. Education of pupils for empathic and assertive communication.</p>

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD100A/22	<b>Course title:</b> Pedagogical propaedeutics
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture <b>Recommended study range:</b> <b>hours weekly:</b> 2 <b>hours per semester:</b> 26 <b>Teaching method:</b> on-site	
<b>Credits:</b> 4	<b>Working load:</b> 100 hours
<b>Recommended semester/trimester:</b> 1.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Students will take one subtest during the semester and a final written exit exam at the end of the semester. The final grade will be the sum of the scores obtained from the subtest (max. 30 points) and the final written test (max. 70 points).	
<b>Learning outcomes of the course:</b> After completing the pedagogical propaedeutics course, the student will acquire the following knowledge, skills and competences: <b>Knowledge:</b> The student will acquire the theoretical foundations of the pedagogical process, He/she will be able to characterize the concept of pedagogy, classify and evaluate basic pedagogical concepts and categories, apply them in other pedagogical disciplines and be able to understand them in broader contexts. <b>Skills:</b> The student can effectively and creatively apply acquired knowledge, experience and skills in improving the process of learning and improving pedagogy as a science. Reflect on the contemporary conception of pedagogy, the subject of pedagogy, and the content of pedagogy. Define the structure of pedagogical sciences, the relationship to other sciences, to other disciplines. Newly acquired knowledge, information and experience can integrate and process for the benefit of the development of the field and their practical application. <b>Competences:</b> Acquired theoretical knowledge will enable the student to effectively manage, solve problems, assess pedagogical views and ideas of prominent educators according to the chronological period. <b>Verification of the degree of acquired knowledge, skills and competences:</b> Verification of the degree of acquisition of relevant knowledge, skills, and competencies by the student is accomplished through the presentation of seminar work and written examinations during the semester coursework.	
<b>Course contents:</b> Brief outline of the course:	

1. 1. Pedagogical thinking in ancient Greece and Rome, important representatives: sophists, Socrates, Plato, Aristotle, Seneca, Quintilianus.
2. Pedagogical views in the medieval period. Christianity and the transformation of education, important representatives: A. Augustinus, T. A. Augustine, A. Aquinas, Origen, Tertullianus, Hieronymus. Education in the Middle Ages - the emergence of medieval universities.
3. Pedagogical views in the period of Renaissance and Humanism, Reformation and Counter-Reformation. Bacon, Luther, Ignatius of Loyola, Kalazansky.
4. J. A. Comenius. Pedagogical views in the period of the Enlightenment and the classical-idealist epoch. Leibniz, Locke, Rousseau, Descartes. Slovak pedagogy in the early 18th and 19th centuries.
5. Pedagogical thought of the 19th and 20th centuries. Important pedagogues in Slovak history. Their contribution to the development of education in Slovakia.
6. Contemporary scientific understanding of pedagogy. Definition of the term "pedagogy", contemporary conception of pedagogy, subject of pedagogy, content of pedagogy.
7. Structure of pedagogical sciences, relation to other sciences to other disciplines. Educational reality: basic concepts and relations.
8. Educational processes in the context of society. The essence of the educational process, structure, general model of the educational process, types, input determinants of the educational process.
9. Profile of education in the school classroom.
10. School management, basic concepts and problems. Classroom management, concepts, phases, variables of classroom management.
11. Components of good management. School and educational problems.
12. Designing in school. The educational process in the Christian school. Method, system, management, organization of Christian schooling, education and training.
13. Educational systems of some monastic societies. Their significance and contribution to the contemporary educational process.

<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Conditions for successful completion of the subject: 1. Submission of ongoing semester papers. 2. Project work focused on the life story of a person with an intellectual disability in the period of adolescence/adulthood/senior age. 3. final oral examination. During the semester, there will be a written test: to get an A grade you need to get at least 93%, to get a B grade at least 85%, for a C grade at least 77%, for a D grade at least 69% and for an E grade at least 60%. Subject evaluation: A – 100%-93% B – 92%-85% C – 84%-77% D – 76%-69% E – 68%-60% Fx – 59%-0%	
<b>Learning outcomes of the course:</b> Objective of the subject: The aim of the course is to provide the basic theoretical foundations of special pedagogical counseling provided to people with disabilities, impairments and threats in the conditions of the Slovak Republic during adolescence, youth and senior age. Learning outcomes: After completing the subject, the student will acquire the following knowledge, skills and competences: - acquire basic theoretical knowledge about the system and organization of counseling in special pedagogy; - can apply when understanding the provision of counseling as part of counseling activity and at the same time considers it as part of comprehensive social rehabilitation;	

- can analyze, synthesize and compare mediated information about the use of counseling facilities from the point of view of family and expert, individual types and specific counseling activities for the period of adolescence and senior age.

**Course contents:**

Tasks of counseling when working with a person in the period of adolescence and senior age. Theoretical foundations of special pedagogical counseling with an emphasis on social counseling. Development and perspectives of special pedagogical counseling for clients in the developmental period of adolescence, adulthood and senior age. Care programs for an indicated group of clients with a medical handicap.

<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 2 / 2 <b>hours per semester:</b> 26 / 26 <b>Teaching method:</b> on-site	
<b>Credits:</b> 4	<b>Working load:</b> 100 hours
<b>Recommended semester/trimester:</b> 4.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Active participation in the selected practice facility. Processing of ongoing written assignments after completing each day of practice. Submitting the assessment opinion of the practice supervisor. Submission of the final analysis of the processed practice records. The subject is finished with a presentation of practical results. Subject evaluation: A – 100%-93% B – 92%-85% C – 84%-77% D – 76%-69% E – 68%-60% Fx – 59%-0%	
<b>Learning outcomes of the course:</b> Objective of the subject: The aim of the subject is to apply the acquired knowledge in the active learning of the educational process of children and pupils with mental disabilities in a special school, in a regular school or in a special educational institution. Learning outcomes: After completing the subject, the student will acquire the following knowledge, skills and competences: - applies acquired knowledge in active recognition of the educational process; - is able to compile a hospitalization record and carry out observation; - performs activities specific to a teacher's assistant; - is able to participate in support activities within a formal and informal environment; - direct teaching. Defines educational and rehabilitation processes. Ongoing special pedagogic practice is part of the acquisition of competences in the field of special pedagogy, focused on the use of observation, creation of case reports and the design of specific educational activities as methods of special pedagogic work with the client/clients. At the facility, under supervision, the student participates in special pedagogical support with the clients of the	

facility and prepares a written protocol after each practical day. Based on the observation, he prepares a detailed, ongoing individual record of the meeting (observation record).

**Course contents:**

Active observation of the educational process. Management of hospital records. Analysis of educational and rehabilitation processes, special pedagogical advice. Preparation for direct application of theoretical knowledge and practical skills in the field.

The student is informed about the progress of the bachelor's practice in the special-pedagogical field and the rehabilitation field, the special-pedagogical counseling is familiar with the documentation and with the indicators for hospitalization registration. Analysis of educational and teaching units, analysis of case work, rehabilitation course, counseling process with different content. The specificity of extracurricular education in facilities for individuals with mental disabilities. Acquaintance with the current trends in the services provided. Hearings on the educational activities of individuals with mental disabilities. Getting to know the somatic characteristics of students with mental disabilities. Auditions and trial activities in interested units. Establishing contacts with children as part of leisure activities. Observation of direct educational activities in the school club of the elementary school near the hospital. Interest activity, preparation for teaching. Conduct hearings with analysis from a special-pedagogical point of view. The listening sessions also serve to get to know the class team and the individual performances of the pupils. Studying the personal documentation of students (health status, nature of the disability and its etiology). Establish communicative contact with the class in the form of conversation, conversation with students.

**Recommended or required literature:**

The student studies the professional literature continuously according to the recommendations of the supervisor of the given facility and in the context of the issue that will be addressed during the internship.

<b>Learning outcomes of the course:</b> <b>Course Objective:</b> The aim of the course is to gain information about the possibilities and limits of special occupational education and elements of occupational therapy in a group of children/pupils with special educational needs. The aim of the course is to learn how to create activities with the use of special occupational education and occupational therapy. <b>Learning Outcomes:</b> Upon completion of the course, the student will acquire the following knowledge, skills and competencies: - Gain information about the possibilities and limits of special occupational education in a group of children/pupils with special educational needs; - be able to design specific activities or a short-term programme using elements of special work education, taking into account the specific needs within the framework of the individual specificities of the handicap during individual and group forms of assistance;	

- has a general knowledge of the didactics of special work education;
- knows appropriate occupational therapy methods and techniques to use as elements in a preventive or developmental programme when working with children and pupils with special educational needs in formal and informal processes;
- can apply theoretical knowledge of education and therapy and can apply it in specific educational situations, exercises and games with individuals with intellectual disabilities.

Upon completion of the course, students will gain information about the possibilities and limits of special education by working with a group of children/pupils with special educational needs. Theoretically, they will be able to provide guidance, accompaniment, design specific activities, or short-term program, which will take into account the specific needs within the framework of the individual specificity of the handicap during the implemented special education work in individual and group form of assistance.

#### **Course contents:**

Terminological systems and legislative bases of work and technical education for individuals with disabilities. Historical aspects of work and technical education of individuals with intellectual disabilities. Psychodidactic analysis of the acquisition of elementary work competencies of individuals with intellectual disabilities. The process of acquiring work and technical competencies of children, students and clients with intellectual disabilities. Educational, habilitation and rehabilitation specifics of work education of children, pupils and clients with intellectual disabilities. Tasks and goals of work education of individuals with intellectual disabilities. Non-material teaching means of labour education of children, pupils and clients with intellectual disabilities. Tangible teaching means of work education of children, pupils and clients with intellectual disabilities. Material aspects of implementation of labour education of children, pupils and clients with intellectual disabilities. Technological aspects of labour education of children, pupils and clients with intellectual disabilities. Work education in the educational content of educational programs of school children's clubs and school boarding school with a focus on children and pupils with intellectual disabilities. Professional and practical-manual competences of a special educator in the preparation and implementation of educational content with elements of work or technical education.

Safety, ergonomic, hygienic and aesthetic attributes of work activities of children, pupils and clients with intellectual disabilities in the process of work education. Input to occupational therapy (Occupational Therapy). Occupations - manipulative, constructive and creative. Short term occupational therapy programme for a child/pupil with a mental disability.

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD118B/22	<b>Course title:</b> Specifics of working with individuals with behavioral disorders
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 1 / 3 <b>hours per semester:</b> 13 / 39 <b>Teaching method:</b> on-site	
<b>Credits:</b> 4	<b>Working load:</b> 100 hours
<b>Recommended semester/trimester:</b> 6.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Prerequisites for successful completion of the course: 1. active participation in seminars, meeting the conditions of max. 2 excused absences, 2. elaboration and presentation of a seminar paper (proposal of activities for a child and a pupil with behavioural disorders for use in the home and school environment), 3. final colloquial examination. There will be a written test during the semester: a minimum of 93% is required for a grade of A, a minimum of 85% for a grade of B, a minimum of 77% for a grade of C, a minimum of 69% for a grade of D, and a minimum of 60% for a grade of E. Course Assessment: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%-0%	
<b>Learning outcomes of the course:</b> <b>Course Objective:</b> The aim of the course is to provide basic theoretical and practical background towards the specifics of education of pupils with behavioural disorders. <b>Learning Outcomes:</b> Upon completion of the course the student will acquire the following knowledge, skills and competences: - master professional information and knowledge of theoretical and practical nature in the field of education of pupils with behavioural disorders; - know the specifics of the educational process of pupils with behavioural disorders;	

- can apply the acquired theoretical knowledge in the development of teaching aids used in the education of pupils with behavioural disorders.

**Course contents:**

Specifics of working with individuals with behavioral disorders - basic theoretical background and research findings. Etiology, symptomatology, and prevention in the management of specific developmental behavioral disorders in adolescence, adulthood, and the senior years. Prevention and intervention programs oriented towards behavioural disorders and their possibilities/limitations of application in institutions (social, health, ...). Conditions for the provision of care for persons with behavioural disorders in the school system of the Slovak Republic.

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD108B/22	<b>Course title:</b> Strategies and support of individuals with autism spectrum disorders in the special education process
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 1 / 3 <b>hours per semester:</b> 13 / 39 <b>Teaching method:</b> on-site	
<b>Credits:</b> 4	<b>Working load:</b> 100 hours
<b>Recommended semester/trimester:</b> 2.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Conditions for successful completion of the subject: 1. active participation in seminars, fulfillment of conditions max. 2 excused absences, 2. processing of the seminar work and its presentation (elaboration of the case study of a child with an autistic spectrum disorder); 3. final written examination. During the semester, there will be a written test: to get an A grade you need to get at least 93%, to get a B grade at least 85%, for a C grade at least 77%, for a D grade at least 69% and for an E grade at least 60%. Subject evaluation: A – 100%-93% B – 92%-85% C – 84%-77% D – 76%-69% E – 68%-60% Fx – 59%-0%	
<b>Learning outcomes of the course:</b> Objective of the subject: The aim of the subject is to provide basic theoretical and practical starting points towards strategies and support of individuals with autism spectrum disorders in the special pedagogic process. Learning outcomes: After completing the subject, the student will acquire the following knowledge, skills and competences: - the student will acquire basic theoretical knowledge about autism spectrum disorders; - can analyze, synthesize, compare and transfer information about the etiology and symptomatology of autism spectrum disorders; - learns about the triad of autism spectrum disorders;	

- will be well-versed in the system of special pedagogical counseling aimed at individuals with autism spectrum disorders at various stages of ontogenetic development;
- acquires basic knowledge regarding intervention aimed at individuals with autism spectrum disorder.

#### **Course contents:**

Strategies and support of individuals with autism spectrum disorders in the special pedagogic process - introduction to the issue, theoretical starting points. Terminological approaches towards pervasive developmental disorders. Classification of autism spectrum disorders. Triad of autism spectrum disorders. Prevalence of autism spectrum disorders. Etiology of autism spectrum disorders. Comprehensive diagnosis of autism spectrum disorders. Early intervention aimed at a child with autism spectrum disorder. A family with a child with an autism spectrum disorder. Problems of a family with a child with an autism spectrum disorder. Complex approaches to a family with a child with an autistic spectrum disorder in the special pedagogic process. Intervention aimed at individuals with autism spectrum disorders (Behavioral intervention, Alternative and augmentative communication, Son-rise program, Handle, DIR/Floortime, Sensory integration, Art therapy, Ergotherapy and others). Special educational counseling aimed at a child with an autism spectrum disorder at an early age. Special pedagogical counseling aimed at a child with an autism spectrum disorder in preschool age. Special pedagogical counseling aimed at a school-age child with an autistic spectrum disorder. Special pedagogical counseling aimed at individuals with autism spectrum disorders during adolescence. Special pedagogical counseling aimed at individuals with autism spectrum disorder in adulthood.

## COURSE INFORMATION SHEET

<b>University:</b> Catholic University in Ružomberok	
<b>Faculty:</b> Faculty of Education	
<b>Course code:</b> KSPED/Sp-BD112B/22	<b>Course title:</b> Strategies and support of individuals with behavioral disorders in the special education process
<b>Type and range of planned learning activities and teaching methods:</b> <b>Form of instruction:</b> Lecture / Seminar <b>Recommended study range:</b> <b>hours weekly:</b> 1 / 3 <b>hours per semester:</b> 13 / 39 <b>Teaching method:</b> on-site	
<b>Credits:</b> 4	<b>Working load:</b> 100 hours
<b>Recommended semester/trimester:</b> 5.	
<b>Level of study:</b> I.	
<b>Prerequisites:</b>	
<b>Requirements for passing the course:</b> Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Prerequisites for successful completion of the course: 1. active participation in seminars, meeting the conditions of max. 2 excused absences, 2. elaboration and presentation of a seminar paper (elaboration of a case study of a child with a behavioural disorder); 3. final group colloquium. There will be a written test during the semester: a minimum of 93% is required for a grade of A, a minimum of 85% for a grade of B, a minimum of 77% for a grade of C, a minimum of 69% for a grade of D, and a minimum of 60% for a grade of E. Course Assessment: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%-0%	
<b>Learning outcomes of the course:</b> <b>Course Objective:</b> The aim of the course is to provide a basic theoretical and practical background towards strategies and support for individuals with behavioural disorders in the special education process. <b>Learning Outcomes:</b> Upon completion of the course, the student will have the following knowledge, skills, and competencies: - The student will acquire a basic theoretical understanding of behavior disorders; - the student will be able to analyse, synthesise, compile and transfer information on the aetiology and symptomatology of behavioural disorders; - acquire knowledge about the specificities of behavioural disorders in relation to the educational process and the achievement of results;	

- be well versed in the system of special educational counselling aimed at individuals with behavioural disorders at different stages of ontogenetic development;
- acquire basic knowledge of interventions for individuals with behavioural disorders.

#### **Course contents:**

Strategies and support for individuals with behavioural disorders in the special education process - introduction to the issue, theoretical background. Special pedagogy of individuals with behavioural disorders - development of the field, terminological definition, perspectives. Aetiology, symptomatology, prevention in the management of specific developmental behavioural disorders in early childhood, pre-school and school age. Specifics of communication with children/pupils with developmental behavioural disorders. Characteristics and peculiarities of different types of developmental behavior disorders. Behavior disorder-oriented prevention and intervention programs and their possibilities/limitations of application in regular and special schools. Conditions of education of children/pupils with behavioural disorders in the school system of the Slovak Republic.
