COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD100B/22	Course title: Approaches to working with minority groups
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 1.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Within the implementation of the course methods of lecture, discussion, group work of students, independent work of students, work with video, work with statistics and Internet resources are used. Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject and during the examination period. The student is obliged to participate in the exercises. A maximum of 3 absences per semester are accepted. During the semester, students will solve assigned problems in the exercises. The final assessment will be a closed-question test (ABCD). The final assessment for full-time students will be based on the total points obtained in the practicals and in the written examination. 20 points in the structure can be obtained for passing the course: - 10 points per test - 4 points for active participation - 6 points for completing the tasks during the exercises. For the external form of study, a written examination during the examination period will be worth 16 points, active participation will be worth 4 points. The minimum number of points required to pass the course is 12. Course evaluation: A - 20-19 points B - 18-17 points C - 16-15 points D - 14-13 points E - 12 points Fx - 11-0 points	
Learning outcomes of the course: Aim of the course: to understand what are the implications of belonging to a minority group for an individual and what are the specifics of social work when working with some minority groups. Learning outcomes: After completing the course, the student will acquire the following knowledge, skills and competences: Knowledge: students will gain background information on the issue of minorities, their structure, types, social connections with traditional and newly emerging minorities in the environment of the Slovak Republic. Skills: Students will be able to identify the different	

types of minorities and minority groups, the basic attitudes of majorities towards minorities, and the context of interethnic relations and social work. Competences: students will learn methods of social work with members of minorities.

Course contents:

An introduction to majority and minority groups. Minorities in social work.

Concepts related to the topic of minority groups in social work: disadvantage, discrimination, ageism, culture, subculture, counterculture, nationality and ethnic identity, ethnocentrism, multiculturalism, acculturation, culture shock, equality, tolerance, solidarity prejudice and stereotypes, racism, xenophobia, marginalization, social distance, assimilation, integration.

Approaches to Social Work with Minorities: Approaches to Working with Minorities by Musil and Navratil, Antioppressive Approaches of the Social Worker in Working with Minorities.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD101S/22	Course title: Bachelor thesis defence
Type and range of planned learning activities and teaching methods: Form of instruction: Recommended study range: hours weekly: hours per semester: Teaching method: on-site	
Credits: 15	Working load: 375 hours
Recommended semester/trimester: 5., 6..	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Successful oral defence of the bachelor thesis. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Learning outcomes: - present the results of the bachelor thesis in front of an expert committee, - demonstrate theoretical skills related to the process of creating a bachelor thesis, formulate the background and motivation for the choice of the final thesis, - present and defend significant findings in a logically clear manner, - formulate recommendations for pedagogical practice, - to respond and take its own position on the reservations and assessments from the assessments.	
Course contents: The student will present his/her work in front of the expert committee (max. 10 min.) - he/she will justify the meaning and aim of his/her work, explain the methodology and methods used in his/her work and point out the results achieved. After reading the evaluations, he/she reacts to the evaluation, takes a position on any reservations and answers the individual questions posed in the evaluations. Discussion follows.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD104B/22	Course title: Casuistic Seminar
Type and range of planned learning activities and teaching methods: Form of instruction: Seminar Recommended study range: hours weekly: 2 hours per semester: 26 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 3.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Conditions for completion of the course and the subject and the method of verification of the acquired knowledge, skills and competences: Active participation in seminars and preparation of group assignments during the semester: 30% of the student's total grade. During the semester, case studies prepared by the students will be presented in tutorials and will be scored. The evaluation of the case study is as follows: 10: Excellent handling of the attributes and knowledge of the case study and how to address the intervention in working with the client. 9: an average case study without all strategic options for solving the client's problem 8: case study with errors and absences. 7: average knowledge and skills, there are errors in the tasks. 6: Knowledge and skills are below average; there are (significant) errors in the tasks. 5: The knowledge and skills of case study processing still meet the minimum requirements. Lots of errors. 4-0: minimum requirements not met. The examination will take the form of an assessment of a case study prepared by the students and an oral examination. Within this course, the student's sense of autonomy, independence, and self-assessment is fostered. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Course Objective: Learning Outcomes To provide students with a basic understanding of the importance of case reports and case studies to professional practice. Theoretical knowledge: students will learn about the importance of case reports for professional practice. They will get basic information about the structure itself. They will acquire the skills	

of processing professional knowledge, the information obtained about the client, which they will be able to process into a case study, which is an important method in collaboration with other professionals for the successful solution of social problems of clients. Practical skills: to master the procedures for strategic ways of solving client's social problems in a case study and the skill of processing the causal and case study.

Course contents:

Course contents:

1. Terminological definition, objectives, approaches in the case study
2. Types, functions, style of casuistry.
3. Causal approach, strategy, method.
4. The use of case studies in social work,
5. The structure of the case study and the case study in social work.
6. Sources of information for the case study and for the case study
7. Ethics in causal action.
8. Case study processing difference
9. Specific treatment of the case and case study.
10. Types of medical history and the importance of first contact
11. The sequence of work of a social worker in the development of a case report and case study
12. The importance of verbal and non-verbal communication in a case study

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD108B/22	Course title: Demography
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 5.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Verification will be carried out during the semester on the basis of set assignments presented in the exercises (30% of the total mark, max. gain of 30 points), and oral examination (70% of the total mark, max. gain of 70 points). Assignments during the semester: will be given at the beginning of the semester according to current events in society (with links to the field of social work). Mainly the relevance and timeliness of the sources used in the assignments will be evaluated. The assignments will be in the form of a power-point presentation, the presentation of the assignment itself will be a minimum of 10 minutes. Oral examination: will test the student's ability to apply the acquired knowledge in the field of demography to social work practice. The course syllabus with the required knowledge will be published to the students in the Moodle system.	
Learning outcomes of the course: Knowledge: - The student will have knowledge of basic demography Skills: - The student will be able to search relevant sources from various demographic databases, - the student will be able to apply the results of demographic science and practice, especially in population and family policy	
Course contents: 1. Position of demography in the system of sciences, division of demography, founders of demography. 2. Population, population reproduction. 3. Sources of demographic data, demographic indicators and demographic symbolism. 4. Basic data on the number, distribution and density of the population. 5. Population structure by sex and age. 6. Population structure by marital status. 7. Household types.	

8. Marriage rate. 9. Divorce rate. 10. Fertility. 11. Fertility. 12. Abortion rate.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD109B/22	Course title: Digital social work
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 5.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Within the implementation of the course are used methods of lecture, discussion, group work of students, independent work of students, work with computer and mobile applications, video and image, work with Internet resources. Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject and during the examination period. The student is obliged to participate in the exercises. A maximum of 3 absences per semester are accepted. During the semester, students will solve assigned problems in the exercises. Ongoing assignments focus on identifying their level of digital literacy, creating web content about social work, and digital social work methods and techniques. External students will submit a written paper describing the implementation and results of the assignments. The final assessment will be a closed-question test (ABCD). The test examines the extent to which knowledge and skills from the learning outcomes have been mastered. 20 points in the structure can be obtained for passing the course: - 10 points for the final test - 4 points for active participation - 6 points for completing the tasks during the exercises. The minimum number of points required to pass the course is 12. Course evaluation: A - 20-19 points B - 18-17 points C - 16-15 points D - 14-13 points E - 12 points Fx - 11-0 points	
Learning outcomes of the course: Course Objective: 1. To introduce students to a range of assistive technologies, communication tools and online systems that social workers can use to deliver services.	

2. Explore how information and communication technologies (ICTs) affect individuals, families and communities.

3. Explain to clients the technologies that are used in everyday life to meet their needs.

Learning outcomes:

After completing the course, the student will acquire the following knowledge, skills and competences:

Knowledge:

- Gain an overview of the technologies and applications that enable online social work
- Understanding the online and technology needs of people using services (clients/service users)
- Understanding communication tools and platforms
- Familiarity with online client protection
- Knowing how to safely share appropriate data with colleagues

Skills:

- Provision of services through digital technologies and online platforms
- Act in the best interests of clients when using technology
- Content creation on online platforms and social media
- Assessing the validity and reliability of information
- Strategies for obtaining information from the online environment

Competencies:

- By completing the course, the student will be able to use a wide range of digital tools to deliver social work interventions. The student will be able to analyse the digital needs of clients and support their digital competences.
- Prepare for ethical decision-making in the online world
- Will be able to encourage and instruct clients to perform everyday tasks online (e.g., posting a message on Facebook, applying for a job online, paying bills using an app, etc.)

Course contents:

1 Overview of digital technologies in social work 1

Electronic systems (software) to facilitate the day-to-day work of social workers (e.g. email, electronic case management systems, calendaring and team collaboration technologies such as SharePoint)

Online resources for professionals and people using social work services (e.g. apps and websites)

Assistive technologies for clients (e.g. communication aids and robots).

2 Overview of digital technologies in social work 2

Social media interfaces (e.g. Twitter, Facebook, Snapchat, Skype, WhatsApp) used by social workers and clients

Working with information - how information, including large files, is used and analysed, how data is used to determine aggregate need and to monitor and improve services

Data protection, privacy and the use of personal, identifiable data - e.g. how social workers hold and use information about people who contact services to improve their direct care or share information about them with professionals

3 Overview of digital technologies in social work 3

Information management (e.g. search, retrieval, online information, data security and access issues)

Hardware (e.g. smartphones and web-enabled laptops)

Online learning (e.g. professional e-learning, online courses, webinars, online communities of practice)

4 Digital literacy for social workers: instrumental skills, structural skills, strategic skills.

5 Understanding the online and technology needs of people using services (different client groups)

6 Service delivery through digital technologies (online social work interventions).

7 Ethical decision-making: ethical decisions, ethical mistakes

8 Online protection (risks associated with the use of digital technologies for children and adults)

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD108A/22	Course title: Diversity and inclusion
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 3 / 2 hours per semester: 39 / 26 Teaching method: on-site	
Credits: 5	Working load: 125 hours
Recommended semester/trimester: 2.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Course completion requirements and method of verification of acquired knowledge, skills and competences: Active participation in seminars and preparation of group assignments during the semester: 30% of the student's total grade Attendance and quality of active participation in seminars: active participation in the formulation and analysis of problems, evaluated correctness of speech, completeness, argumentation, dialogue with other group members; completion of individual and group tasks, presentation of practical tasks; The evaluation of the intermediate tasks is as follows: 10: excellent knowledge and skills acquired during the tasks. 9: very good; 8: well, there may be some minor errors. 7: average knowledge and skills, there are errors in the tasks. 6: Knowledge and skills are below average; there are (significant) errors in the tasks. 5: Knowledge and skills still meet the minimum requirements. Lots of mistakes. 4-0: minimum requirements not met. A student can earn 10 points if he/she completes an Erasmus+ mobility Student's final grade at the end of the semester: 70% A final essay in one of the course areas (20,000 characters of actual text) that will be made available to students during the semester; The assessment will consider the completeness and clarity of the content of the essay; the fulfilment of academic writing requirements; and the quality of the analysis. The assessment will take into account the student's independence in the preparation of the essay. The final assessment will take into account the independent preparation of the solution to the assignment/essay/case, which will require the student to analyse the problem/topic stated in the set assignment using the learned frameworks. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69%	

E - 68%-60%

Fx - 59%- 0%

Learning outcomes of the course:

Course Objective:

Learning outcomes:

After completing the course, the student will acquire the following knowledge, skills and competences:

- The student will be able to: understand, critically analyse and evaluate the contribution of different social science and humanities theories as well as domestic and international knowledge to micro and macro practice and research on diversity and inclusion;
- be able to analyse, critically evaluate and improve policy decisions regarding their impact on people in all sectors, especially in the fields of nature, employment, education, health and social inclusion;
- will be able to choose appropriate strategies and methods in model situations of inclusive environments;
- will be able to assess the potential impact of applied strategies and methods on the company's processes according to the types of diversity;
- Identify and apply methods to promote the concepts of inclusion, diversity and equality in youth work practice in order to counter discrimination and inequalities affecting young people.

Course contents:

- Introduction to the subject - Definition of the terms diversity , inclusion, equality, Types of diversity, Historical and philosophical foundations of understanding diversity and inclusion, Anthropological - value bases and ethical principles of the optimal model of inclusion;
- Cultural differences in Europe - different perspectives on diversity, inclusion and equality
- Inclusion, diversity and equality legislation - international and national legislation in the context of diversity, inclusion and equality in general;
- Documents, strategies and other formal support for inclusive practice of youth work organisations
- Spontaneity and informal learning in the development of inclusive practice in organisations
- Erasmus+ inclusion and diversity strategies
- Discrimination and anti-discrimination practice

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD105B/22	Course title: Field Social Work
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 1 / 1 hours per semester: 13 / 13 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 3.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: During the semester, students undergo theoretical training, visit the field and get to know the work of field social workers in specific environments. At the same time they identify a model of functioning of field social work in Slovakia, from strategic documents to practice, which they process and present in the form of a term paper. They will receive a maximum of 30 % for the semester paper and a maximum of 70 % for the final written examination. In the case of part-time study, there will be a written examination (max. 100%). The final assessment for full-time students will be based on the total number of points obtained in the exercises and the written examination. The student knows the terminology in the field of field social work and can define the standards and legislative framework in the performance of field social work. Understands the stages of working with clients and methods of field social work. 3. Applies acquired knowledge in mapping and assessing community needs in the context of field social work. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Aim of the course: to understand the principles of social work in the field, its background and practical division - according to the type and target groups. To acquire information about types and methods of field social work with application to specific target groups. Theoretical knowledge: field social work (objectives, specifics, types), target groups at risk, methods of field social work, organisation (designing and financing) of field social work. COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD121A/22	Course title: Fundamentals of Methodology and Statistics in Social Work
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 3 / 3 hours per semester: 39 / 39 Teaching method: on-site	
Credits: 7	Working load: 175 hours
Recommended semester/trimester: 5.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Verification will be carried out during the semester on the basis of set assignments presented in the exercises (20% of the total mark - maximum score of 20 points), on the basis of a year's work (40% of the total mark - maximum score of 40 points) and an oral examination (40% of the total mark - maximum score of 40 points). Assignments presented during the semester: at the beginning of the semester, each student will be given a list of assignments that will be reviewed throughout the semester (related to the topic to be covered). The assignments will cover searching for relevant sources and data in the field of social research, searching for and understanding the results of quantitative and qualitative research, understanding the basic statistical operations in quantitative research: mean, median, mode, standard deviation, etc. The assignments will include the following Year paper: the student will produce a year paper of at least 15 pages, which will include, among other things, a research project. The detailed requirements to be fulfilled in the year paper will be made available to students via Moodle. Oral examination: the oral examination will consist of a range of topics covering the basics of methodology and statistics. Students will be provided with a course syllabus outlining the required knowledge. The syllabi will be available via Moodle.	
Learning outcomes of the course: Knowledge: - Students will be proficient in the fundamentals of methodology and statistics in the social sciences and social work, Skills: - Students will be able to design a simple research project to investigate a specific problem in social work - Students will be able to search for relevant sources and verifiable data related to social research, - Students will be able to write a year-long paper that includes a review of sources and the essential parts of a research project - Students will have an understanding of quantitative and qualitative studies,	

Competencies: - Students will know and be able to articulate the basic steps in the research process and be able to formulate a research project.

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD100A/22	Course title: Philosophical and Historical Foundations of Social Work
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture Recommended study range: hours weekly: 3 hours per semester: 39 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 1.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Within the implementation of the course are used methods of lecture, discussion, independent work of the student, work with video, work with a title from fiction. Verification of the extent to which the student has acquired the relevant knowledge, skills and competences is carried out by questions from the lecturer and discussions during lectures and by a test during the examination period. The final assessment will be a closed-question test (ABCD). The test examines the level of mastery of knowledge in the history of social work and philosophy. The test will also include questions on required readings. Course evaluation: A maximum of 20 points can be obtained for the test. The minimum number of points required to pass the course is 12. Evaluation of the test: A - 20-19 points B - 18-17 points C - 16-15 points D - 14-13 points E - 12 points Fx - 11-0 points Attendance at the lectures is not compulsory, but is discounted. For regular attendance (max. 3 absences per semester in case of full-time study and full attendance in case of part-time study) the student can get 2 bonus points.	
Learning outcomes of the course: Course Objective: The aim of the course is (1) to provide an overview of the historical development of social work from its simplest, i.e. spontaneous and unorganized forms of assistance through gradual institutionalization and professionalization to its current state, when it is understood not only as a professional profession, but also as an established scientific discipline. Another (2) aim of the course is to introduce students to the fundamentals of philosophical reasoning, to place social work in a broader philosophical context. Learning outcomes:	

After completing the course, the student will acquire the following knowledge, skills and competences:

Knowledge:

The student possesses knowledge of individual areas of the field of study and its interdisciplinary contexts at the level of synthesis, namely the foundations of philosophy and history of social work.

Skills:

The student can ask philosophical questions while observing social reality and understands how the ideas of philosophers have shaped society.

Competencies:

Can identify the importance of knowledge of the history of social work for the professional practice of social work and use knowledge of history and philosophy to practice social work and develop social work knowledge.

Course contents:

1. History and its periodization in terms of time, space; material definition. Critique of sources.
2. Narrower and broader understanding of the history of social work, history of aid. The subject of the history of social work.
3. Historical origins of solidarity. History of aid. Social history in the primitive religions of natural peoples.
4. Social history of ancient Mesopotamia and ancient Egypt. Social history of archaic Indo-Europeans. Social history of ancient Greece and Rome.
5. Help in Buddhism, Judaism, Christianity and Islam.
6. History of social work in the Middle Ages. Religious orders.
7. History of social work in modern times.
8. Modern history of social work.
9. History of social work in Slovakia.
10. History of social work by target groups.
11. Philosophical questions. Critical thinking. Basic areas of philosophy.
12. Different conceptions of man. Selected basic phenomena of human existence.
13. History of philosophical thought with emphasis on empiricism, rationalism, positivism, and existentialism.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD111A/22	Course title: Social Work with a Group
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 2 / 2 hours per semester: 26 / 26 Teaching method: on-site	
Credits: 5	Working load: 125 hours
Recommended semester/trimester: 3.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Throughout the semester, students will present their knowledge and skills during group exercises. Attendance and participation in these group activities will account for 25% of the overall grade. The other 25% of the assessment consists of self-moderation of the chosen group work method with a group of students. As part of this, students will be able to demonstrate links between theoretical knowledge and practice. This will be implemented after half of the lectures have been completed. 50% of the assessment will be made up of the student's theoretical knowledge demonstrated during the final test. The overall final assessment will be based on the total points obtained from participation in group events, moderation of the chosen method in a group of students and a final test of theoretical knowledge. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Course Objective: To enable students to learn about group social work, its benefits, risks, use in working with clients, including elements of group dynamics and methods of group work. Learning outcomes: After completing the course, the student will acquire the following knowledge, skills and competences: Graduate Knowledge: After completing the course, students will know: the principles of formation, development and possibilities of forming a social group of clients, the basics of the structure and content of group work, the functions and possibilities of the group leader in group social work. They will know the	

objectives, methodology, justification and conditions for the application of methods of working with a group of social clients and apply selected methods of group work in practice.

Graduate Skills:

Upon completion of the course, students will have a basic skill in the selection and use of group work methods, with their own experience as a participant in group social work, using participatory group work methods.

Graduate competences: after completing the course, students will have the elementary competence to work with a group of clients.

Course contents:

- group, social client group, social work with group
- group dynamics, its importance for group work,
- group dynamics factors, especially group roles,
- Group development as a significant factor in group dynamics and its importance when working with a group of clients,
- the structure and content of group work,
 - o introduction to group work - getting to know each other, expectations concerns, rules, motivation, forming a group,
 - o the core of group work - psychological and social stabilization of the client, self-knowledge, self-reflection and self-development, activation, motivation of the client in the group,
 - o conclusion of the work with the group - action plan, transfer, evaluation,
- methods of working with social groups (directive and participative), their definition, principles of use, conditions, risks, advantages and limitations of the application of individual methods of group work,
- the position and roles of the group leader in the different phases of group development, in the use of different methods and in relation to specific group roles and group events
- real training of selected methods of working with a group of students

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD118A/22	Course title: Social pathology
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 3 / 2 hours per semester: 39 / 26 Teaching method: on-site	
Credits: 7	Working load: 175 hours
Recommended semester/trimester: 4.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Active participation in seminars and preparation of group assignments during the semester: 30% of the student's total grade Attendance and quality of active participation in seminars: active participation in the formulation and analysis of problems, evaluated for correctness of speech, completeness, argumentation, dialogue with other group members; completion of individual and group assignments, presentation of practical assignments; Assessment of intermediate tasks is as follows: 10: excellent knowledge and skills acquired during the tasks. 9: very good; 8: good, some minor errors may occur. 7: average knowledge and skills, there are errors in the tasks. 6: knowledge and skills are below average; there are (significant) errors in the tasks. 5: Knowledge and skills still meet the minimum requirements. Many errors. 4-0: minimum requirements not met. Attendance and pass mark in the oral exam: 70%/ 10 points In the oral examination, the student will be assessed on a number of criteria such as: The student's speech during the exam and his/her orientation to the issue chosen from the topics covered, the student's analytical skills in relation to the chosen issue, the student's ability to relate the knowledge gained to current events in society at the national and global level, the student's ability to take a stand in important contexts of socio-pathological behaviors and events in society, and the student's ability to demonstrate individual opinions and attitudes in relation to their implications for the future of human society (10 -9); Student's speech is oriented with minor errors, student only partially connects his/her knowledge to societal events, student can only partially take positions and opinions on the analyzed issue with errors (8-7); the student responds satisfactorily to the questions, but his/her independent analysis is at a very low level, the speech is very simple with incorrectly used terminology, he/she can only very superficially connect his/her knowledge with social reality, he/she cannot take attitudes and opinions on social events related to social pathology (6-5); the student has significant deficiencies in speech and in the use of professional terminology, the analysis of the chosen topic is superficial, the student is very poorly oriented in the field of social pathology, he/she cannot independently reach his/her own conclusions and attitudes (4-1).	

A - 100%-93%
B - 92%-85%
C - 84%-77%
D - 76%-69%
E - 68%-60%
Fx - 59%- 0%

Learning outcomes of the course:

After completing the course, the student will acquire the following knowledge, skills and competences:

- Knows the basic characteristics and specific features of individual client groups of social work in the context of social pathology. Orientation in social work institutions and facilities with target groups of clients whose social behaviour is deviant.
- Can identify and link knowledge and information from other related disciplines - psychology, criminology, law, pedagogy, sociology
- Knows the required terminology in the field of social pathology in the social science system.
- Understands the roles of social work in the prevention and resolution of individual socio-pathological phenomena in connection with the methodology of social work.
- Applies the acquired knowledge and skills in designing adequate methods of social work in dealing with specific social pathological phenomena.

Course contents:

An introduction to social pathology. The place of social pathology in the system of social sciences. The concept of social pathology.

Social deviance.

Sociological theories and concepts of social deviance.

The Chicago School.

Theories of anomie according to Durkheim. Theories of anomie according to Merton.

Theories of cultures and subcultures. Tension theory. Labelling theory. Socio-pathological phenomena, characteristics, typology. Analysis of factors and causes of socio-pathological phenomena.

The role of social work in the prevention and solution of individual socio-pathological phenomena in connection with the methodology of social work.

Institutional and field social work with selected target groups of social work.

Learning outcomes of the course:**Course Objective:**

The main objective of the course is to provide students with knowledge, skills and expand competencies in the area of small social group functioning, group dynamics and effective factors of teamwork. Partial objectives are the skills of forming and building a work team, analyzing group processes and leading teamwork.

Learning outcomes:

The graduate has knowledge in the field of group and team cooperation, knows the effective factors of teamwork, differentiates the individual elements of group dynamics and their potential in a working team, knows the developmental stages of teamwork and understands the risks of team deterioration.

The graduate has mastered social skills necessary to lead team processes at the executive and social level, is able to apply methods and forms of teamwork in achieving the goals of social work in a multidisciplinary team.

The graduate has the competences to create, build and effectively lead work teams, to solve professional, relational and procedural issues of teamwork, including coping with challenging work situations in a given social, personal, professional and historical context.

Course contents:**Course contents:****1. Interactive methods of development and correction**

Principles of interactive learning in the present form - contact, relationship, atmosphere, contract, two-way communication. Three factors of effective training process - support, development and correction. Methods of group interaction in the training process. The role of trainer, lecturer, facilitator.

2. Teamwork

Group and team work - definition. Group work team dynamics. Synergistic effect of teamwork. The context of the emergence and existence of the work team in the social system. Power and its distribution in the work team. The phenomenon of groupthink.

3. Effective teamwork factors

Defining and identifying with goals. Homogeneous vs. heterogeneous work teams. Cooperation and competition as essential elements of a team. Productive form of opposition, conformity and group pressure. Development and risks of team deterioration. Performance and satisfaction as key indicators of teamwork. Risks and potential for managing misunderstandings and conflict transformation in the work team. Team leadership and the roles of the identified team leader. Formal and informal team relationships. The culture of the work team. A healthy social environment. Organizational change and the work team.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD106A/22	Course title: Social work with individuals
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 3 / 2 hours per semester: 39 / 26 Teaching method: on-site	
Credits: 6	Working load: 150 hours
Recommended semester/trimester: 2.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: Throughout the semester, students will present their term paper on an assigned topic, for which a maximum of 20% may be earned. Another 20% will be awarded for a demonstration of an interview with a client, where they will be able to highlight the specifics of the work when selecting a particular type of client, and will be able to demonstrate the link between theoretical knowledge and practice. 60% will be awarded during the final test. The final grade will be based on the total points obtained from the seminar paper, the client interview demonstration, and the written exam. Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Course Objective: After completing the course, students will know the principles of creation, development and possibilities of forming methods of working with clients, the basics of the structure and content of work with an individual. Students will be informed about individual and case-based social work, the process of assessment, intervention in relation to the stages of social work with the individual. Learning outcomes: After completing the course, the student will acquire the following knowledge, skills and competences: Graduate Knowledge: The graduate possesses knowledge of individual areas of the field of study and its interdisciplinary contexts at the level of synthesis, namely the basics of methods and forms of social work in direct and mediated work with the client. Graduate Skills:	

They can plan, select and use an adequate methodology of work for their intervention professional activity and evaluate the effectiveness of the assistance provided.

Course contents:

1. Definition of basic terms (social work with an individual, individual social work, case social work, case work)
2. History of social work with individuals, its development and current status
3. Basic principles of social work with the individual
4. Typology of clients in social work, specifics of work
5. Personal and professional prerequisites of a social worker for working with a client
6. Professional relationship between social worker and client, boundaries of the relationship between social worker and client, disturbances of these boundaries
7. Stages of social work with an individual - familiarisation with the case
8. Stages of social work with an individual - assessment
9. Stages of social work with an individual - social intervention, case closure
10. Communication with the client in social work with an individual, principles of optimal communication
11. Conducting an interview with a client in social work with an individual, questions in communication
12. Methods in working with clients, introduction to sociotherapy

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-BD113A/22	Course title: Theories of Social Work
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: 3 / 1 hours per semester: 39 / 13 Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 3.	
Level of study: I.	
Prerequisites:	
Requirements for passing the course: There will be two written quizzes in lectures during the semester, with a maximum of 20 points for each quiz. A minimum of 20 points must be obtained from the quizzes in order to participate in the exam. Students may earn a maximum of 60 points on the final oral examination. In the external form of study, there will be a written examination (max. 40 points) before the oral examination. The final grade will be based on the total number of points obtained from the examinations and the oral examination. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Course Objective: The aim of the course is to gain an overview of selected theories of social work, which are the theoretical basis of current methods of social work with individuals and groups. Learning outcomes: After completing the course, the student will acquire the following knowledge, skills and competences: Theoretical knowledge: students will integrate knowledge from selected theoretical models into their own cognitive framework, know their meaning and use in social work. Practical skills: students will be able to identify the specifics of selected theories in social work practice. Competency: Students will be competent to identify selected approaches in social work practice and choose them based on their specifics and client needs. They also have the competence to select an eclectic approach.	
Course contents:	

1. Basic concepts.
2. Types of theories in social work, their breakdown.
3. Working with theories in social work practice. Theoretical purism and eclecticism.
4. Characteristics, analysis, specifics of selected theories and theoretical models applied in social work:
 - humanistic theories (especially Rogers' human-centered approach and Berne's transactional analysis,)
 - existential theories (consider Frankl's existential analysis of logotherapy),
 - Behavioral theories and cognitive-behavioral theories,
 - dynamic approaches,
 - task-oriented approach,
 - Social-psychological communication theories,
 - A systemic approach.
5. Identification of the specifics of each approach in practical exercises.
