COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-ME107A/23	Course title: Evidence-based social work
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: hours per semester: 4s / 4s Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 2.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: Conditions for completion of the course and the subject and the method of verification of the acquired knowledge, skills and competences: Continuous assessment: active work on seminars consisting in creative solution of assigned tasks aimed at the development of critical and scientific thinking, development of a project task, min. 80% participation in seminars. The student may obtain a maximum of 30 points in the intermediate assessment phase. Final assessment: a final written examination from which the student may obtain a maximum of 70 points. The final grade is the sum of the points obtained from the interim assessment and the final written examination. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Course aim: To introduce students to evidence-based practice and to highlight the importance of using scientific knowledge in social work practice. Learning outcomes: After completing the course, the student will acquire the following knowledge, skills and competences: Knowledge: The graduate is proficient in the theoretical underpinnings of evidence-based practice. Understands its importance in social work practice. Knows the process of applying evidence-based practice. Skills: The graduate will acquire skills in searching the results of research studies in domestic and international scientific databases, in their interpretation, critical assessment and in the possibilities of their practical use in work with clients.	

Competencies

The graduate is competent to search for adequate knowledge obtained by the scientific method in relevant national and international databases. He/she is able to solve practical problems of social work based on the results of scientific research. The student is able to correctly interpret research results, drawing on the knowledge acquired in courses focused on quantitative and qualitative research strategies.

Verification of the level of acquired knowledge, skills and competences:

Verification of the extent to which the student has acquired the relevant knowledge, skills and competences is carried out on the basis of an assessment of activity and creativity during the seminars, on the basis of an assessment of the quality of the project and on the basis of a written examination.

Course contents:

1. Methods of cognition (scientific method).
2. Characteristics of evidence-based practice.
3. Essential steps of evidence-based practice.
4. Identifying the client's problem and transforming the problem into scientific language.
5. Searching for evidence in expert sources (peer-reviewed books and journals, international scientific databases, systematic reviews, lists of effective programmes, guidelines).
6. Critical appraisal of scientific evidence and its application and application in practice.
7. Process evaluation.
8. The importance of reporting psychometric properties of research methods in published research studies.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-ME101A/23	Course title: Research Methodology
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: hours per semester: 12s / 8s Teaching method: on-site	
Credits: 7	Working load: 175 hours
Recommended semester/trimester: 1.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Verification will be carried out during the semester on the basis of set assignments presented in tutorials (20% of the total mark), on the basis of the development of a research project (40% of the total mark) and an oral examination (40% of the total mark).	
Learning outcomes of the course: After completing the course, the student will acquire the following knowledge, skills and competences: <ul style="list-style-type: none"> - the student will be familiar with the methodology and statistics of research in social work, - the student will be able to recommend current approaches in social work research, - the student will be able to plan and implement research in social work, - the student will be able to carry out the individual steps of the quantitative research process: creating a probability and non-probability research population, creating a questionnaire, evaluating the psychometric properties of a measurement instrument, formulating research hypotheses and understands the selection of a statistical test to test the hypotheses, - the student will be able to use IBM SPSS statistical software at the level of descriptive and inferential statistics, - the student will know the basic approaches of qualitative research, know and understand data processing in qualitative research. 	
Course contents: <ol style="list-style-type: none"> 1. Baseline and research population, probability and non-probability sampling, representativeness of the research population. 2. Creation of the research instrument - questionnaire, scaling. 3. Psychometric properties of the measurement instrument - validity and reliability. 4. Basics of working with IBM SPSS statistical software - creating data matrix, describing variables in tables and graphs, creating contingency tables. 5. Comparison and correlation of variables. 6. Experiment. 	

7. Formulation and verification of statistical hypotheses and selection of statistical tests.
8. Basic qualitative research approaches - case study, ethnographic research, grounded theory, phenomenological research.
9. Methods of qualitative research data collection.
10. Preparing, coding and displaying data in qualitative research.
11. Basics of working with Atlas.ti software.
12. Writing final reports of qualitative and quantitative research.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-ME102A/23	Course title: Selected client's groups in social work
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: hours per semester: 12s / 4s Teaching method: on-site	
Credits: 6	Working load: 150 hours
Recommended semester/trimester: 1.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. During the semester, students will present their seminar work on a given topic, for which a maximum of 30% can be obtained. where they will be able to demonstrate the link between theoretical knowledge and practice. 70% can be obtained during the final test. The final grade will be based on the total points obtained from the seminar paper and the written examination. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Course Objective: Students will theoretically master the methodology, methods and techniques in working with individual client groups of social work. They will also be able to apply this knowledge in practice, in practical problem solving with individual social work client groups. Learning outcomes: Upon completion of the course the student will acquire the following knowledge, skills and competences: Graduate knowledge: The graduate has extensive knowledge of theories and methods of social work with social work client groups. The student is familiar with the characteristics and specific features of individual client groups of social work and knows the methodology, methods and techniques of working with clients. Graduate Skills: The graduate is able to find, address, motivate for cooperation and independently assess the life situation of the client/clients with regard to the specifics and needs of the respective group and	

determine the degree of social risk of his/her/their life situation, plan, select and use adequate methodology of work for his/her intervention professional activity and evaluate the effectiveness of the provided assistance.

Graduate competences:

The graduate is prepared to represent and promote the interests of vulnerable groups. He/she acts ethically in the practice of social work.

Course contents:

1. Selected social phenomena and social adaptation

Social aspects of developmental crises of adolescence, adulthood and old age. Physical, cognitive, emotional, social and existential factors of personal maturation. Quality of life and social adaptation/ maladaptation of the individual in the context of physical health, socio-pathological and psychopathological factors.

2. Selected client groups of social work in terms of social adaptation

Social adaptation and its characteristics. Social disadaptation - its causes, forms, developmental stages and consequences. Age and health aspects of social adaptation.

2.1 Social adaptation in childhood, adolescence and adulthood.

Historical, cultural, socio-economic factors and criteria for appropriate social adaptation. Personality diversity and social expressions in childhood, adolescence and adulthood. The construct of normality in social work. Sources, motivations and forms of antisocial, dissociative and antisocial expressions. Primary and secondary behavioural disorders. Conduct disorders, oppositional defiance disorder, attention (and hyperactivity) disorders, identity disorders, impulse disorders, group influences and group conformity in childhood and adolescence. Problems of social adjustment in adulthood in the areas of relationships, self-actualization and self-actualization. Issues of health in physical, psychological and social terms. Coping with crisis and difficult life situations and events.

The possibilities and limits of social work in the prevention, resocialisation, re-education, sociotherapy and psychotherapy of symptoms and syndromes of social maladaptation.

2.2 Social adaptation to threats to health and life

Health, terminal illness, dying, death and bereavement. Stages of coping with the approach of death in the client and relatives. Specifics of communication. Care options for clients within different forms of hospice and palliative care. The role of social work, competencies of the social worker, grief counselling. Ethical issues and dilemmas, euthanasia and dysthanasia.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-ME114A/23	Course title: Social work training (assertiveness, mediation, and ethics)
Type and range of planned learning activities and teaching methods: Form of instruction: Seminar Recommended study range: hours weekly: hours per semester: 12s Teaching method: on-site	
Credits: 2	Working load: 50 hours
Recommended semester/trimester: 4.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: Continuous assessment: active work on seminars consisting in participation in solving model problems, group work and creative problem solving aimed at developing assertive communication and behaviour, mediation and ethics. Final evaluation: the final evaluation consists of an assessment of the students' active work in the social work training. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Aim of the course: the aim of the training is to provide students with a comprehensive complex of knowledge and skills related to assertive communication and behaviour, conflict resolution through mediation and to offer suggestions for ethical thinking of a social worker. Learning outcomes: After completing the course, the student will acquire the following knowledge, skills and competences: Knowledge: The graduate is familiar with the theoretical background of assertive communication and behaviour, is aware of the importance of assertiveness in the practice of a social worker, knows the basic assertive rights (and duties), is familiar with the principles of neutralization techniques. Can describe and define the possibilities of applying assertiveness when working with a client. The graduate will also learn about mediation as a conflict resolution process, its benefits, forms and process. The student is aware of the possibilities and importance of using mediation in social work and the necessary communication and mediation skills of a social worker. The graduate knows the code of ethics of a social worker, knows the basic ethical dilemmas of social work. Skills:	

The graduate gained practical experience in assertive behaviour and mediation in an experiential way, practiced the possibilities of assertive communication and mediation of conflicts in model tasks, gained the skill of assertive reacting using neutralisation techniques and the skill of selected mediation methods in group work. Further, he/she is prepared to think and act ethically within the ethical standards of social work.

Competencies

The graduate is competent to integrate social skills - assertiveness and mediation into the solution of practical tasks arising from the practice of a social worker. He/she is aware of the importance of ethics in social work, the existence of ethical dilemmas in social work and is competent to solve them ethically.

Verification of the level of acquired knowledge, skills and competences:

Verification of the degree of acquisition of relevant knowledge, skills and competences of the student is carried out on the basis of the assessment of activity and creativity during the seminars (solving model problems, case studies, group work, etc.).

Course contents:

Brief outline of the course:

1. Assertiveness - definition.
2. The importance of assertive behaviour for the social worker, the client and the social environment.
3. Principles of assertiveness. Basic assertive rights.
4. The meaning and application of assertive rules in the relationship with the client and in working with the client.
5. Neutralization techniques.
6. Practice assertive reactions in an interactive way.
7. Mediation - definition. Mediation and conflicts.
8. Advantages of mediation.
9. Forms and process of mediation.
10. Communication skills and procedures in mediation.
11. Social worker in the role of mediator.
12. Ethics - definition.
13. Code of ethics for social worker and organization.
14. Ethical dilemmas and ethical reasoning in social work.

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-ME105A/23	Course title: Social work with children and families
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: hours per semester: 12s / 4s Teaching method: on-site	
Credits: 5	Working load: 125 hours
Recommended semester/trimester: 2.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: Conditions for completion of the course and the subject and the method of verification of the acquired knowledge, skills and competences: Active participation in seminars and preparation of group assignments during the semester: 40% of the student's total grade Attendance and quality of active participation in seminars: active participation in the formulation and analysis of problems, evaluated correctness of speech, completeness, argumentation, dialogue with other group members; completion of individual and group assignments, presentation of practical assignments; Assessment of intermediate tasks is as follows: 10: excellent knowledge and skills acquired during the tasks. 9: very good; 8: good, some minor errors may occur. 7: average knowledge and skills, there are errors in the tasks. 6: knowledge and skills are below average; there are (significant) errors in the tasks. 5: Knowledge and skills still meet the minimum requirements. Many errors. 4-0: minimum requirements not met. As part of the student's evaluation, the student will visit a field site, a facility with a target group of children and youth, where the student will complete a case study. 10% Student's final grade at the end of the semester: 50% A final essay in one of the subject areas (20,000 characters of actual text) and its references in the examination. In the individual assessment with the student, consideration will be given to the completeness and clarity of the essay content, the quality of the academic writing and the overall quality of the essay's production. Independent preparation of an essay/case solution that will require the student to analyze the problem stated in the essay topic assignment will require the implementation of the learning frameworks of knowledge and competencies (4 points). The analysis should include a definition and analysis of the selected problem (1 point), identification of critical issues, major parties, and other stakeholders (2 points), discussion of issues contributing to the solution of the problem and recommendations addressed to the appropriate nature of the case (2 points), and proper use of scholarly literature (1 point). For 10 points there is a 100% (excellent) rating and so on. Course Evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: After completing the course, the student will acquire the following knowledge, skills and competences: - The graduate has a broad knowledge of theories, methods and forms of social work in direct social work practice with client groups and theoretical concepts of social policy at the assessment level. - The student is familiar with the characteristics and specific features of the target group of children and young people in the context of social work and is familiar with the	

methodology and statistics of research in social work. - The graduate is able to search, address, motivate for cooperation and independently assess the life situation of the client/clients with regard to the specifics and needs of the respective group and determine the degree of social risk of his/her/their life situation, plan, select and use adequate work methodology for his/her intervention professional activity and evaluate the effectiveness of the provided assistance. - The graduate is able to carry out social counselling, social rehabilitation, crisis intervention, social assessment, social work with an individual, social work with a family, social work with a group and social work with a community. It critically reflects on the experience of professional practice. - Is prepared to represent and promote the interests of vulnerable groups. COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-ME101B/23	Course title: Sociotherapy
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: hours per semester: 4s / 4s Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 1.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: Throughout the semester, students will present their term paper on an assigned topic, for which a maximum of 20% may be earned. Another 20% will be earned for performing a demonstration of a sociotherapeutic intervention, where they will be able to demonstrate the link between theoretical knowledge and practice. 60% will be earned during the final test. The final grade will be based on the total points earned from the seminar paper, the client interview demonstration, and the written exam. Verification of the degree of acquisition of the relevant knowledge, skills and competences of the student is carried out on the basis of theoretical and practical examinations during the semester teaching of the subject. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Course Objective: Upon completion of the course, students will be able to use new and effective approaches, identify the potential of the social environment and use social environmental factors to improve social functioning and quality of life of clients. They will gain expertise in the field of sociotherapy using sociological, systems, social-ecological and humanistic-existential theories. Gain skills for conducting individual, family, group and community sociotherapy. They will be able to practice interpersonal dynamics with consideration of intrapsychic processes, strategies and methods of alternative conflict resolution. They will be able to identify and activate the resources of the client, his/her social environment and use the synergistic effect of family, group and community. Learning outcomes: After completing the course, the student will acquire the following knowledge, skills and competences: Graduate Knowledge:	

<p>The graduate has knowledge in the field of sociotherapy, is able to identify the potential of the social environment and to use the factors of the social environment to improve the social functioning and quality of life of clients.</p> <p>Graduate Skills:</p> <p>He/she is able to use interpersonal dynamics in a practical way, he/she is able to identify and activate the resources of the client and his/her social environment.</p> <p>Graduate Competencies:</p> <p>Possesses professional communication skills, can perform social therapy, critically reflects on professional practice experiences.</p>
<p>Course contents:</p> <ol style="list-style-type: none"> 1. Definition and application of sociotherapy and psychotherapy in social work 2. Marie Krakešová - social-educational therapy, psychogenetic analysis, introduction to practice in social clinics, client according to M. Krakešová 3. Social competences of a sociotherapist 4. Sociotherapeutic intervention, intervention methods in sociotherapy 5. Assessing a person's life situation, mapping the social network, setting goals 6. Motivational interviewing, sociotherapeutic interview 7. Social communication with the client 8. Conflict resolution in sociotherapy 9. Schemes of transactional analysis in sociotherapy 10. Client-oriented approach 11. Encounter group 12. Applied sociotherapy 13. Sociotherapeutic Opportunities and Barriers to Sociotherapy

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-ME110A/23	Course title: Supervision
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture / Seminar Recommended study range: hours weekly: hours per semester: 4s / 8s Teaching method: on-site	
Credits: 3	Working load: 75 hours
Recommended semester/trimester: 3.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: Active participation in seminars and preparation of group assignments during the semester: 40% of the student's total grade Attendance and quality of active participation in seminars: active participation in the formulation and analysis of problems, evaluated for correctness of speech, completeness, argumentation, dialogue with other group members; completion of individual and group assignments, presentation of practical assignments; Assessment of intermediate tasks is as follows: 10: excellent knowledge and skills acquired during the tasks. 9: very good; 8: good, some minor errors may occur. 7: average knowledge and skills, there are errors in the tasks. 6: knowledge and skills are below average; there are (significant) errors in the tasks. 5: Knowledge and skills still meet the minimum requirements. Many errors. 4-0: minimum requirements not met. As part of the mid-term evaluation, an interview will be conducted with a social worker who regularly receives supervision as part of his/her job in order to gain a comprehensive view of the advantages, benefits or disadvantages and shortcomings of supervision from the perspective of the supervised social worker. Student's final grade at the end of the semester: 60% The exam will include a written test consisting of 2 open-ended questions (including one case/ problem situation). Assessment: Excellent knowledge and skills: essentially comprehensive answer, correct terminology; Very good knowledge and skills. Some minor errors; Good knowledge and skills. Some minor errors with grammatical and stylistic errors. Average knowledge and skills, text lacks inconsistency and relevance. Fair knowledge and skills, there are major errors. Knowledge and skills meet minimum requirements. Does not meet minimum requirements, student has failed; Course Evaluation:	

<p>A - 100%-93%</p> <p>B - 92%-85%</p> <p>C - 84%-77%</p> <p>D - 76%-69%</p> <p>E - 68%-60%</p> <p>Fx - 59%- 0%</p>
<p>Learning outcomes of the course:</p> <p>After completing the course, the student will acquire the following knowledge, skills and competences:</p> <ul style="list-style-type: none"> - Possess knowledge of supervision, management and design in social work. - He/she is able to plan and implement research in social work and use supervision as a tool for his/her professional development. - He/she has knowledge of the possibilities of applying supervision in his/her future practice. - Is able to follow the different stages of supervision in accordance with the law and is oriented to the possibilities of implementing supervision in their future workplace. - He/she has an overview of the legislative norms related to supervision in Slovakia.
<p>Course contents:</p> <p>An introduction to reflective and critical thinking in supervision. Different definitions and contexts of supervision. Supervision in historical perspective. Goals of supervision. The process of supervision. Ethics in the supervision process. Theoretical approaches, types and forms of supervision.</p> <p>Legislative framework of supervision in social work.</p> <p>Phases and stages of supervision in social services. COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KSP/Sc-ME106A/23	Course title: Theories and Approaches in Social Work
Type and range of planned learning activities and teaching methods: Form of instruction: Lecture Recommended study range: hours weekly: hours per semester: 12s Teaching method: on-site	
Credits: 4	Working load: 100 hours
Recommended semester/trimester: 2.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: There will be two written quizzes in lectures during the semester, with a maximum of 20 points for each quiz. A minimum of 20 points must be earned in the quizzes in order to sit for the exam. Students may earn a maximum of 60 points on the final oral examination. In the Part time of study, there will be a written examination (max. 40 points) before the oral examination. The final grade will be based on the total number of points obtained from the examinations and the oral examination. Course evaluation: A - 100%-93% B - 92%-85% C - 84%-77% D - 76%-69% E - 68%-60% Fx - 59%- 0%	
Learning outcomes of the course: Course Objective: The aim of the course is to gain an overview of selected theories of social work, which are the theoretical basis of current methods of social work with individuals and groups. It is an expanding overview of social work theories. Learning outcomes: After completing the course, the student will acquire the following knowledge, skills and competences: Theoretical knowledge: students will integrate knowledge from selected theoretical models into their own cognitive framework, know their meaning and use in social work. Practical skills: students will be able to identify the specifics of selected theories in social work practice and, based on their specifics and the resulting benefits for the client and the solution of the problem, to choose from them an appropriate approach for a specific work with a client. Competency: students will have the competence to make professional choices about the theoretical approach in social work practice.	

Course contents:

1. Basic concepts.
2. Types of theories in social work, their breakdown.
3. Working with theories in social work practice. Issues of applying theoretical approaches in social work.
4. Characteristics, analysis, specifics of selected theories and theoretical models applied in social work:
 - phenomenological theories
 - ecosocial approaches
 - system theories
 - antioppressive approaches
 - Egan's model of the task-oriented approach.
5. Identification of the specifics of the different approaches in the practical seminars, including the approaches of which knowledge is assumed: the human-centred approach, existential analysis and logotherapy, the systemic approach, dynamic approaches, behavioural theories and cognitive-behavioural theories, the task-oriented approach, social-psychological communication theories.
